

Health and Hygiene

F10® SC Concentration 5L - £288.97

Product Code: 30303850

F10® SC is a veterinary disinfectant which achieves a broad spectrum kill of potentially harmful micro-organisms. It is active against bacteria, viruses, fungi and spores, and environmentally effective against the protozoal oocysts of cryptosporidium, coccidia and giardia. It is an excellent product for achieving a high level of biosecurity effectively and safely as it poses no hazard to yourself and is completely safe to use in presence of animals when used at recommended concentrations.

At working dilutions it is non-corrosive, non-toxic, non-tainting and non-irritating, and is also chlorine- and aldehyde-free.

F10® Disinfectant Aerosol Fogger 500ml - £27.07

Product Code: 30281237

F10® Aerosol Fogger is a 500ml single use canister for complete room disinfection.

Simply place the canister in the room and activate the fogger for quick, easy and effective disinfection. The F10® disinfectant will be expelled and dissipate throughout the room within 5 minutes. Safe for re-entry after mist has settled – approximately 10 minutes. Use one canister per approximately 35 cubic meters of air space.

The solution in the aerosol fogger is F10SC Disinfectant at a 1:80 dilution, which is effective against even high resistant viruses such as Circovirus (PBFD) or Parvovirus.

USING THE F10® AEROSOL FOGGER

- Use for high level disinfection of waiting rooms, theatres, labs, classrooms and any area where there is a risk of airborne contamination
- Use as part of a regular or seasonal cleaning programme or to thoroughly disinfect an entire room following a potentially infectious outbreak
- Quick, easy and effective disinfection of all surfaces, walls, ceilings and air-spaces
- Allow to air dry
- Do not use in the presence of animals (due to the alcohol propellant)

F10® Disinfectant Ready to Use 1L - £12.59

Product Code: 30303861

F10® Antiseptic Solution is a multi-purpose broad spectrum preparation effective against a wide range of bacteria, fungi, viruses and spores.

It can be used as a topical application to treat and help prevent re-infection in a variety of clinical situations.

USING F10® ANTISEPTIC SOLUTION

A convenient product, already supplied at 1:250mls dilution rate, for use as above. Can also be diluted further to enable it to be used in any of the circumstances outlined.

F10® Antiseptic Solution 100ml - £14.29

Product Code: DISMEAF10S

F10® Antiseptic Solution 200ml - £20.66

Product Code: DISMEAANTI

F10® Antiseptic Solution is a multi-purpose broad spectrum preparation effective against a wide range of bacteria, fungi, viruses and spores.

It can be used as a topical application to treat and help prevent re-infection in a variety of clinical situations.

USING F10® ANTISEPTIC SOLUTION

Wound irrigation and treatment

Remove gross contamination as necessary. Prepare a 1:250 F10® Antiseptic Solution using normal saline and irrigate the wound site as required. Dressings can be soaked in the Antiseptic Solution and bandaged over the wound site. Abscesses may also be flushed out using a prepared 1:250 solution. Abraded or inaccessible areas not suitable for high volume flushing can be sprayed with the Antiseptic Solution and allowed to dry.

Large volume lavage

Where required a 1:500 solution can be used within the abdominal cavity as an antiseptic lavage in cases of sepsis, organ perforation or rupture or inadvertent leakage during surgery. Excess liquid should be removed before closure.

Respiratory conditions

Nebulise using a 1:250 F10® Antiseptic Solution made with distilled water for a period of 20-30 minutes once or twice daily for as long a period as determined by response to therapy. F10® Antiseptic Solution has not been shown to interfere with other medication concurrently delivered by nebulisation.

Sinus and nasal flushing

For the removal of accumulated mucous, inflammatory material and the control of infection. Use a 1:250 of F10® Antiseptic Solution made with normal saline. Restrain the animal with its head downwards to avoid aspiration and syringe the cavity as required.

Oral use

A 1:500 to 1:1000 solution of has been shown to be effective as a crop lavage for the treatment of yeast and bacterial infections. Administer by gavage tube.

Skin, scale and feather decontamination

Treat the patient by spraying, soaking or washing with a 1:250 F10® Antiseptic Solution or by placing it in a nebulising chamber until the body surface is thoroughly moistened. Leave to air dry. Full body immersion in a 1:1000 solution has been shown to be effective at treating skin problems in some species of reptile and amphibians.

F10® Barrier Ointment 25g - £9.50

Product Code: 30303920

F10® Barrier Ointment 100g - £16.73

Product Code: MAH006

F10® GERMICIDAL BARRIER OINTMENT

F10® Germicidal Barrier Ointment is a multi-purpose broad spectrum preparation effective against a wide range of bacteria, fungi, viruses and spores. The F10® actives are presented in an easily applied preparation containing lanoline emollient which helps to maintain and restore skin viability and assist the ointment to adhere to the skin surface to form an effective antimicrobial barrier. It is ideal as a topical application to treat and help prevent re-infection in a number of clinical situations either alone or in conjunction with associated therapies. The F10® Germicidal Barrier Ointment has been shown to maintain 100% residual action after 5 days.

USES OF F10® GERMICIDAL BARRIER OINTMENT

Superficial skin lesions, burns and open or contaminated wounds: Where appropriate first clean and flush the lesion with F10® Antiseptic Solution. Aseptically blot dry. F10® Germicidal Barrier Ointment can now be directly applied. The Barrier Ointment is effective in both superficial lesions and deep penetrating wounds. Defects can be packed with the Ointment or applied to wounds that are then covered by dressings. Treatment of isolated lesions such as ringworm, packing skin and scale defects: Defects in the body integument can be packed with Germicidal Barrier Ointment. The protective and antimicrobial actions assist in the regeneration of normal functional tissue and assist in preventing reinfection.

F10® Barrier Ointment 25g - £14.06

Product Code: 30327270

F10® Germicidal Barrier Ointment with Insecticide combines the antimicrobial and insecticidal capabilities of the F10® Germicidal Wound Spray with the barrier and emollient qualities of the F10® Germicidal Barrier Ointment.

It is a multi-purpose broad spectrum preparation effective against a wide range of bacteria, fungi, viruses and spores. The F10® actives are presented in an easily applied preparation containing lanoline emollient which helps to maintain and restore skin viability and assist the ointment to adhere to the skin surface to form an effective antimicrobial barrier.

The insecticidal content - Cypermethrin (0.25%) and Piperonyl Butoxide (1.25%) - has the capabilities of repelling flies and preventing or eliminating infestations due to fly strike.

USES OF F10® GERMICIDAL BARRIER OINTMENT WITH INSECTICIDE

- Post fly-strike: Use to treat the damaged tissue to promote normal healing, help prevent re-infestation
- Open wounds: Use in situations where open wounds may be susceptible to fly-strike. The ointment is pink, so it can be easily recognised if it has been washed/wiped off

Warning - As it contains Cypermethrin, it should not be used on cats. Do not contaminate waterways as toxic to aquatic life

F10® Disinfectant Wipes - £11.56

Product Code: 30303919

A convenient pack of biodegradable, single-use wipes impregnated with F10SC for instant clean up and disinfection*. F10® Disinfection Wipes are highly effective against bacteria, fungi and viruses, and the F10SC disinfectant which impregnates the wipes is at a 1:100 dilution, a dilution proven effective against the most resistant viruses, including circovirus (PBF), parvovirus and coronavirus. Sold in a tub of 100 wipes (each approx 110mm x 120mm).

The F10® disinfectant wipes are highly effective and yet non-irritant and non-corrosive so can be effectively and frequently used on surfaces and equipment. They are also kind on skin so can be used for hand decontamination when washing facilities are unavailable.

Check your current wipes:

Are they effective against viruses? Many wipes are just antibacterial. F10® Disinfectant Wipes are antibacterial, antifungal and antiviral.

Are they kind to skin? Not all wipes are designed for frequent use and can dry out skin. F10® Disinfectant Wipes are non-irritating and can even be used for hand decontamination.

*Please note that effective disinfection can only occur without the interference of large amounts of organic debris. Therefore in 'clean up' circumstances we would recommend a 'pre-clean' wipe and then use of a second wipe for optimal disinfection purposes.

F10® Wound Spray and Insecticide 100ml - £20.82

Product Code: 30303952

F10® Germicidal Wound Spray with Insecticide is a ready to use topical, spot-on application spray active against bacteria and fungi for wound treatment with the capabilities of repelling flies and preventing or eliminating infestations due to fly strike. Application of the recommended dosage will usually result in complete elimination of the maggots.

Where the risk of fly-strike is high, following diarrhoea or urinary incontinence for example, use the F10® Germicidal Wound Spray with Insecticide as a preventative control measure.

This preparation combines the excellent properties of the F10® Antiseptic Solution with the added insecticidal activity of Cypermethrin (0.25%) and Piperonyl Butoxide (1.25%)

F10® Germicidal Treatment Shampoo 250ml - £12.56

Product Code: GROF10GER

The F10® actives in the Treatment Shampoo are highly efficient at treating yeast (Malasseziasis) and fungal conditions, such as those causing ringworm, as well as helping to control superficial bacterial infections.

Remember when treating ringworm it is important to 'treat' the environment and to be aware of the zoonotic implication of the disease. F10® Biosecurity products provide a range of both personal hand care products and safe environmental disinfectants for the control of collateral spread.

Tamodine Veterinary Wound and Skin Cleanser 100ml - £9.86

Product Code: PAION100

Vetark Tamodine Wound Cleaner can be used against bacteria, protozoa, yeasts, fungi and some viruses. The wound cleaner has all of the activity of free iodine but with greatly reduced irritant sensitising effects and it does not stain. Tamodine is suitable for cleaning mouth rot lesions in the mouths of reptiles.

We would advise against using Tamodine on amphibian since they can absorb chemicals through the skin.

Arcadia Jungle Dawn LED Bar, 470mm (18.5") 22W - £47.00
Product code: MF038

Arcadia Jungle Dawn LED Bar, 570mm (22.5") 34W - £60.00
Product code: MF039

Arcadia Jungle Dawn LED Bar, 870mm(34") 51W - £79.99
Product Code: MF055

The configuration of an LEDs within a lamp is just as important as its spectrum and output in terms of potential plant growth and illuminated area.

As with all life, plants are reliant on the quantity and quality of energy that is available to them via a light source. The greater the quantity of light, and over a wide enough area equates to better potential results.

A light source of any type can only produce a certain number of photons (parcels/packages of energy) as 'total light output'. As light travels forwards it starts to spread out to cover a greater area. The further away a lamp is placed, the greater the area is that will be covered with light. This is a sharing or spreading of energy over a target, therefore the measured energy within light becomes weaker the further away a lamp is from the target.

To ensure that we have the maximum amount of light possible entering an enclosure we must use enough diodes, placed at the correct distance from each other and with a suitable spectrum, colour and lumen output.

A reduction in the number of diodes, regardless of rated wattage can equate to 'zoning', areas that are very bright and areas that are darker.

We must ensure that all light sources project a 'flood', this provides better results and reduces any risk of ocular damage associated with point source lamps.

Arcadia Pro T5 UVB Kit, Forest 6%, 24W - £71.50

Product Code: MF002

Arcadia Pro T5 UVB Kit, Desert 12%, 24W - £71.50

Product code: MF045

Arcadia Pro T5 UVB Kit, Dragon 14%, 24W - £71.50

Product Code: MF001

ProT5 is a highly adaptable lighting kit with high quality internal electronics, a highly effective but removable reflector, power cable, fittings kit, free link cable and choice of Arcadia Reptile HO-T5 UV-B lamp.

ProT5 uses the very finest electrical components to ensure safe running and long lamp life. Each bar has inbuilt over-voltage, over current, over heating and short circuit protection. ProT5 is Teflon free and free from any reflector coatings that absorb UV.

- Link up to 10 Kits
- Choice of UV-B T5 lamp included, 14% Dragon, 12% Desert or 6% Forest
- Easy to fit inside vivarium's or over mesh
- Lamps made in Germany by the worlds experts
- Flicker free (T5)

For more information visit: www.arcadiareptile.com/lighting/prot5/

Arcadia Pro T5 UVB Kit, Forest 6%, 39W - £77.54

Arcadia D3+ Flood 24W Compact Lamp 12% UVB - £29.00

Product code: MF011

D3+ UV Flood uses state of the art electronics to provide a flicker free and highly energy efficient source of lighting.

- High Light and UVB levels
- Flicker free
- Energy efficient
- Easy internal fitting
- Waterproof
- Easy lamp change
- Produces a targeted flood of UV enabling the keeper to set a photo-gradient
- Allows the proper production and use of the D3 cycle
- Balanced UVA and UVB output and a high CRI natural daylight colour
- For both Desert species and tall vivaria for arboreal species. See our lighting guide for info
- Can be used horizontally or vertically to obtain the area of emission required
- Eliminate MBD!

Arcadia Small Clamp Lamp Fitting 5.5"/ 140, 150W - £26.99

Product code: PAOAKM48

Arcadia Small Clamp Lamp Fitting 8"/ 200, 150W - £35.99

Product code: PAOAKM49

- Sleek and stylish bespoke colour
- Multi directional
- Bolt through clamp lock, Vivarium fitting bracket, Hanging loop, Safety cage, switch

Included

Clamp lamp all arrive as complete kits including fixings, a snap on safety cage and inline switch. If you like sleek modern design and reptile keeping, then Clamp lamp-Graphite is the perfect choice.

Arcadia D3 Basking Lamp 80W - £44.50

Product code: MF009

Arcadia D3 Basking Lamp 100W - £46.50

Product code: MF008

The D3 basking lamp is an ideal all-in-one lamp for providing heat, light and UV. However, every technology has its limitations.

Arcadia reptile are passionate about providing the very best of systems to our captive reptiles. It is for this reason that they always encourage lamp for effective UV provision.

However, it is suggested that in vivariums over 24" in length, a high output T5 lamp is used alongside these UV-rich basking spots. This then allows the animal to decide when and where to bask at a particular time.

Many species of reptile and amphibian require a warm spot under which they can bask and become fully energised with heat and Ultra Violet. As in nature, these basking zones should be UV rich and stable.

Arcadia Flood Lamp Solar Basking 50W - £4.00

Product code: MF035

Arcadia Flood Lamp Solar Basking 100W - £4.99

Product code: MF034

- Provides an ambient heat to an enclosure as a wide flood source
- Includes UVA to aid wellbeing and colour vision
- Increases ambient temperatures
- Warm colour output

Use with a thermostat and alongside a species appropriate Arcadia reptile UVB system.

Arcadia Halogen Basking Spot E27 75W - £4.00

Product code: MF037

Arcadia Halogen Basking Spot E27 100W - £4.99

Product code: MF036

The Halogen Basking Spot is an ideal supplemental lamp for use in conjunction with self-ballasted mercury vapour reptile lamps or fluorescent reptile lighting.

The Arcadia halogen heatspots represent a huge leap forward in the quest to find a source of light and heat that is controllable and is also Eco-friendly.

- Excellent colour rendition
- 2.5 / 3 times the life of tungsten filament lamps
- Splash resistant hard glass construction
- Dimmable
- Emits no harmful UV

(Not suitable for household room illumination).

Arcadia Deep Heat Projector 50W - £25.99

Product code: PAOAKM15

Arcadia Deep Heat Projector 80W - £26.99

Product code: PAOAKM99

Using cutting edge technology to produce the most natural and effective wavelengths of Infra-Red being 'Infra-Red-A' and 'Infra-Red-B'. These wavelengths have been almost impossible to replicate in-balance within a small lamp up until now.

- Mimics heat from the sun using the latest in heating technology
- Provides heat deep into the muscle tissue
- Will not disturb night-time cycles
- Wider/safer beam of heat
- Projects Infrared A and B

For more information about this product visit: arcadiareptile.com/heating/heat-projector/

Arcadia PureSun Mini Bird Lighting Kit - £60.00

Product code: MF049

Produces excellent natural colours and iridescence - 2.4% UVB and 12% UVA for optimal avian use

- Improves feeding and breeding behaviour
- Full spectrum

The Arcadia Bird 'PureSun-Mini' complete lighting system is an easy to use, modern and attractive Full-Spectrum + UV-B kit. This attractive kit will not only help to provide naturally for your pet bird, but it will also allow you to view your bird in the most natural way.

Safety

- Bird lamps remain UV-B potent (within 40% of total output) for one whole year of use
- This is based on using the correct controller and a maximum 12 hour a day photo period. Health concerns should always be reported to a suitable vet who can assess the bird properly
- Do not allow birds long exposure to bird lamps at a distance closer than stipulated by the product. - Humans should remain 12" or more away from the lamp
- Lamps should be turned off before cage maintenance is carried out
- Bird lamps should not be sprayed with water directly
- To be sure of UV-B potency, replace bird lamps once yearly

Arcadia Mini UVB Kit 8W - £33.98

Product code: MF058

- Free link cable
- Highly polished reflector
- Suitable for use in or over vivariums

The Arcadia Reptile UVB Mini Kit arrives as complete with flicker free electronics, reflector and 2.4% UV-B 8w HO-T5 lamp.

This clever fitting also arrives with a free link cable per kit allowing you to link together up to 10 units from one power source. The highly polished reflector ensures that the light is placed onto your pets and is not wasted. Suitable for use in or over vivariums or breeding cages for birds.

Arcadia Compact Lighting Unit - £64.98

Product code: MF006

- Universal ceramic E27 fitting
- Directional light with multiple angles
- Switch on the cable
- Removable safety mesh
- High performance aluminium reflector
- Sturdy aluminum housing
- Lamp not included

Arcadia Compact Bird Lamp 20W - £27.49

Product code: MF005

Replacement bulb for Arcadia Compact Lighting Unit Product code: MF006

- Increased Light Output
- Improved Spectrum
- German Phosphors
- Upgraded Glass
- Robust Electronics

Wattage	20W
UV-B	2.4%
UV-A	30%
Fitting	E27/E26
Kelvin	5800K

E27 Compact Lamp available in voltages 240V and 110V

Code	Voltage	Country
CFBC20X	220-240V	UK/EU

Arcadia Bird Cage Lamp Holder - £25.99

Product code: MF004

Mounting a simple lighting solution can sometimes prove to be tricky. One of the simplest of ways is by using our popular compact lamp bracket. Constructed using a ceramic lamp holder and metal bracket, fits any standard E27 screw fitting, although we recommend our 20W Compact Lamp as it emits a safe amount of UV to fully optimise the best health of your pet bird.

- Compact lighting attached to your cage
- Manual switch on lead
- Universal ceramic E27 fitting
- Easy to use with most available bird cages

Harrisons Adult Lifetime Coarse 454g - £9.30

Product Code: 30278786

Nutritionally complete diet in a size of piece that is usually preferred by larger parrots, such as Amazons

RECOMMENDED USES

After completing a dietary program of High Potency Formula for a period of at least 6 months.

As a year round maintenance formula that meets the nutritional requirements for healthy, non-breeding birds including pious, Amazons, and other medium to large parrots.

FEEDING DIRECTIONS

Feed fresh food daily, do not 'top up'
To help reduce waste, feed as distinct meals

Composition: *Corn, *Hull-less Barley, *Toasted Soybeans, *Peas, *Lentils, *Peanut Kernels, *Sunflower Kernels, *Toasted Oat Groats, *Brown Rice, *Alfalfa, *Psyllium, Calcium Carbonate, Bentonite, *Sea Kelp, Salt, *Algae Meal, *Sunflower Oil.*
CERTIFIED ORGANIC INGREDIENT

Nutritional additives per kg: Vitamins: Vit A 2469 IU, Vit B1 1497 IU, Vit B2 1332 IU, Vit D3 154 IU, Vit E 56 IU, Vit B12 23mcg. Trace elements: Zinc Sulphate 7.4mg, Manganese Sulphate 2.5mg, Copper Sulphate 1.5mg.

Harrisons Pepper Lifetime 454g - £9.30

Product code: 30278786

Because birds can be intolerant of artificial pesticides, fertilisers and preservatives, Harrison's Bird Foods developed the first 100% Organic bird food. The ingredients are premium whole grains and are approved for human consumption. Adult Lifetime Pepper is the standard Adult Lifetime formula with added spicy cayenne oil. It is recommended as year round maintenance formula for healthy, non-breeding birds including pious, Amazons, Eclectus, large Cockatoos, large Macaws and other medium to large Parrots. It can be used as a flavourful treat or to aid in diet conversion. If you're changing your bird's diet from a seed based one, then it is advised to complete a dietary program of High Potency for a period of 6 months first.

We would recommend a veterinary health check prior to changing your bird's diet.

Harrisons Adult Lifetime Fine 454g - £9.30

Product Code: 30278811

Nutritionally complete diet in a size of piece usually preferred by smaller birds - for example a quaker, caique or cockatiel.

RECOMMENDED USES

After completing a dietary program of High Potency Formula for a period of at least 6 months.

As a year round maintenance formula that meets the nutritional requirements for healthy, non-breeding birds including lories, cockatiels, lovebirds, quakers, doves, pigeons and other small to medium parrots.

FEEDING DIRECTIONS

Feed fresh food daily, do not 'top up'
To help reduce waste, feed as distinct meals

Composition: *Corn, *Hull-less Barley, *Hulled Grey Millet, *Toasted Soybeans, *Peas, *Lentils, *Peanut Kernels, *Sunflower Kernels, *Toasted Oat Groats, *Alfalfa, *Brown Rice, *Chia, Calcium Carbonate, Bentonite, Sea Kelp, Salt *Algae Meal, *Sunflower Oil.* CERTIFIED ORGANIC INGREDIENT

Nutritional additives per kg: Vitamins: Vit A 1940 IU, Vit B1 1070 IU, Vit B2 1044 IU, Vit D3 121 IU, Vit E 44 IU, Vit B12 17mcg. Trace elements: Zinc Sulphate 5.8mg, Manganese Sulphate 1.9mg, Copper Sulphate 1.2mg.

Harrisons Adult Lifetime Super Fine 454g - £9.30

Product Code: 30278844

Nutritionally complete diet in a size of piece usually preferred by budgies, finches, parrotlets, cockatiels, lovebirds and canaries.

RECOMMENDED USES

After completing a dietary program of High Potency Formula for a period of at least 6 months.

As a year round maintenance formula that meets the nutritional requirements for healthy, non-breeding birds.

FEEDING DIRECTIONS

Feed fresh food daily, do not 'top up'
To help reduce waste, feed as distinct meals

Composition: *Corn, *Hull-less Barley, *Hulled Grey Millet, *Toasted Soybeans, *Peas, *Lentils, *Peanut Kernels, *Sunflower Kernels, *Toasted Oats, Groats, *Alfalfa, *Brown Rice, *Chia, Calcium Carbonate, Bentonite, Sea Kelp, Salt, *Algae Meal, *Sunflower Oil.* CERTIFIED ORGANIC INGREDIENT

Nutritional additives per kg: Vitamins: Vit A 1940 IU, Vit B1 1070 IU, Vit B2 1044 IU, Vit D3 121 IU, Vit E 44 IU, Vit B12 17mcg. Trace elements: Zinc Sulphate 5.8mg, Manganese Sulphate 1.9mg, Copper Sulphate 1.2mg.

Harrison's High Potency Coarse 454g - £10.26

Product Code: 30278753

The size of piece that is usually preferred by larger parrots, such as Macaws, Cockatoos and African Greys.

RECOMMENDED USES

For birds that are being converted from seeds or any other diet. Birds should initially be fed High Potency Formula for a period of at least 6 months. As a year round formula for African greys, large macaws, Queen of Bavaria conures and other medium to large parrots.

- For birds that have special needs such as birds that are molting, overweight, underweight, particularly active, housed in a cold climate, recovering from an illness or affected by liver or kidney disease
- For birds that are weaning. Birds should be fed High Potency Formula for at least 6-9 months
- For birds that are breeding. Birds should be fed High Potency Formula 1-2 months prior to the breeding period and until chicks are weaned or for at least six months before resuming Adult Lifetime Formula. The amount of supplemental certified organic vegetables and fruits may be increased until the chicks are weaned. For each 2 Tbs (20 g) formula, add 1/2 Tbs (5 g) high quality (certified organic would be best) peanuts or almonds and 1Tbs (10 g) high quality (certified organic would be best) sunflower seeds

FEEDING DIRECTIONS

Feed fresh food daily, do not 'top up'
To help reduce waste, feed as distinct meals

Composition: *Sunflower Kernels, *Hull-less Barley, *Soybeans, *Peas, *Peanut Kernels, *Lentils, *Corn, *Brown Rice, *Toasted Oat Groats, *Alfalfa, *Psyllium, Calcium Carbonate, Bentonite, *Sea Kelp, Salt, *Algae Meal, *Sunflower Oil*
CERTIFIED ORGANIC INGREDIENT

Nutritional additives per kg: Vitamins: Vit A 4409 IU, Vit B1 2677 IU, Vit B2 2380 IU, Vit E 437 IU, Vit D3 276 IU, Vit B12 40mcg. Trace elements: Zinc Sulphate 13.3mg, Manganese Sulphate 4.4mg, Copper Sulphate 2.7mg.

Harrison's High Potency Fine 454g - £10.26

Product Code: 30278775

This is the size of piece usually preferred by smaller birds - for example a quaker, caique or cockatiel.

RECOMMENDED USES

- For birds that are being converted from seeds or any other diet. Birds should initially be fed High Potency Formula for a period of at least 6 months.
- For birds that have special needs such as birds that are moulting, overweight, underweight, particularly active, housed in a cold climate, recovering from an illness or affected by liver or kidney disease
- For birds that are weaning. Birds should be fed High Potency Formula for at least 6-9 months
- For birds that are breeding. Birds should be fed High Potency Formula 1-2 months prior to the breeding period and until chicks are weaned or for at least six months before resuming Adult Lifetime Formula. The amount of supplemental high quality vegetables and fruits may be increased until the chicks are weaned. For each 2 Tbs (20 g) Formula, add 1/2 (5 g) Tbs high quality (certified organic would be best) sunflower seeds

FEEDING DIRECTIONS

Feed fresh food daily, do not 'top up'
To help reduce waste, feed as distinct meals

Composition: *Hulled Grey Millet, *Hull-less Barley, *Corn, *Toasted Soybeans, *Peanut Kernels, *Sunflower Kernels, *Peas, *Lentils, *Toasted Oat Groats, *Brown Rice, *Chia, *Alfalfa, Calcium Carbonate, Bentonite, *Sea Kelp, Salt, *Algae Meal, *Sunflower Oil.* CERTIFIED ORGANIC INGREDIENT

Harrisons Lifetime Mash 454g - £13.84

Product Code: 30278877

This is a coarse powder providing complete nutrition for birds that prefer a powder rather than a solid piece. It can also be sprinkled onto fruit, or moistened with fruit juice or water and then shaped as needed.

RECOMMENDED USES

- After completing a dietary program of High Potency Formula for a period of at least 6 months
- For birds that are potentially allergic to other ingredients
- As a year round maintenance formula that meets the nutritional requirements for healthy, non-breeding birds including canaries, budgies (parakeets), cockatiels, doves, lovebirds, conures, parrotlets, pigeons and other small parrots

FEEDING DIRECTIONS

Feed fresh food daily, do not 'top up'
To help reduce waste, feed as distinct meals

Composition: *Hulled Grey Millet, *Toasted Buckwheat, *Toasted Soybeans, *Sesame Seeds, *Chia, *Alfalfa, Calcium Carbonate, Bentonite, Monocalcium Phosphate, *Sea Kelp, Salt, *Anise Seed, *Algae Meal, *Sunflower Oil.* CERTIFIED

ORGANIC INGREDIENT

Nutritional additives per kg: Vitamins: Vit A 4409 IU, Vit B1 2677 IU, Vit B2 2380 IU, Vit E 276 IU, Vit D3 99 IU, Vit B12 40mcg. Trace elements: Zinc Sulphate 13.3mg, Manganese Sulphate 4.4mg, Copper Sulphate 2.7mg.

Harrisons Power Treats 454g - £11.99

Product Code: 30278822

A nutty treat with added organic palm fruit oil*. A suitable treat for all birds who enjoy the nuttier, slightly sweeter flavour. The added palm fruit oil* can boost the immune system, help improve the quality of the skin and feathers, and has been found to reduce the incidence of feather picking and cataract growth.

Comes in the 'coarse' size only though the pieces can be broken for feeding to smaller birds.

RECOMMENDED USES

Can be used as the only food source to aid in weaning, changing a bird's diet from seeds to Harrison's Bird Foods or as a supplement for birds already fed Harrison's Bird Foods that need extra energy following an illness.

- Beneficial to birds with dry flaky skin (beak, nails), balding of the feet, lack of sheen and proper color to feathers
- Beneficial to most aging birds
- Beneficial to certain species known to eat high oil diets
- High antioxidant content (vitamin E and coenzyme Q10)
- High carotenoid content (precursors to vitamin A) - Good balance of essential fatty acids

SUGGESTED DAILY AMOUNTS:

- Small birds, 1/8 - 11/2 pieces per day
- Medium birds, 3 pieces per day
- Large birds, 9 pieces per day

Composition: *Corn, *Peanut Kernels, *Sugar, *Tapioca Maltodextrin, *Hulled Grey Millet, *Sunflower Kernels, *Hull-less Barley, Peas, *Lentils, *Palm Fruit Oil (3%) *Toasted Oat Groats, *Brown Rice, *Chia, *Alfalfa, *Bentonite, Calcium Carbonate, *Sea Kelp, Salt, *Algae Meal, *Sunflower Oil.* = CERTIFIED ORGANIC INGREDIENT

Nutritional additives per kg: Vitamins: Vit A 1896 IU, Vit B1 1150 IU, Vit B2 1024 IU, Vit D3 119 IU, Vit E 43 IU, Vit B12 18mcg. Trace elements: Zinc Sulphate 5.8mg, Manganese Sulphate 1.9mg, Copper Sulphate 1.1mg.

* the palm fruit oil used comes from sustainable sources in Brazil, and not from south-east Asia where agriculture is threatening wildlife in the region.

Harrison's Bird Bread Original 255g - £11.23

Product Code: 30432762

A baking mix, based on Harrison's Bird Foods, which enables owners to bake their bird a healthy, organic, treat.

RECOMMENDED USES

Provides a healthy alternative for bird owners who choose to prepare their own bird food or those who give regular treats to their birds

- Can be offered instead of table food to birds that like to eat at family mealtimes
- Can be used to assist in converting birds to a formulated diet
- Can be hidden as a foraging reward
- Can be used as a vehicle for administering liquid medications, or encouraging the bird to eat fruit or vegetables as the fruit/vegetables can be baked into the bread
- Provides an easy-to-use transition for hospitalized or boarding birds until acceptance of the appropriate formulated diet
- Can be moistened and offered to birds that are feeding chicks as a soft food
- Can be used as a weaning food to transition to a formulated diet

STORAGE & SHELF LIFE

- Because Bird Bread Mix contains no preservatives, some care is recommended for storage
- If the bag is opened, the top can be zipped closed or rolled down and closed with a chip clip for 4-6 weeks
- Bird Bread can be stored for 1 week in the refrigerator and 6 weeks in the freezer after baking
- Baked Bird Bread can be divided into portions, wrapped in plastic wrap and placed back in the original Harrison's Bird Foods bag for storage in the freezer
- Bird Bread should not be reheated in a plastic container

Composition: *Hulled Grey Millet, *Corn, *Hull-less Barley, *Sweetcorn, *Toasted Soybeans, *Sunflower Kernels, *Peanut Kernels, *Lentils, *Peas, *Toasted Oat Groats, Calcium Carbonate, *Brown Rice, Baking Powder, *Alfalfa, *Psyllium, Bentonite, *Sea Kelp, Salt, *Algae Meal, *Sunflower Oil.* CERTIFIED ORGANIC INGREDIENT

Nutritional additives per kg: Vitamins: Vit A 1323 IU, Vit B1 803 IU, Vit B2 716 IU, Vit D3 83 IU, Vit E 30 IU, Vit B12 12mcg. Trace elements: Zinc Sulphate 6.6mg, Manganese Sulphate 2.2mg, Copper Sulphate 0.8mg.

Harrison's Bird Bread Mix – Hot Pepper 255g - £11.02

Product Code: MAH007

A baking mix, based on Harrison's Bird Foods, which enables owners to bake their bird a healthy, organic, treat. This mix has an additional hot, spicy pepper flavour.

RECOMMENDED USES

Provides a healthy alternative for bird owners who choose to prepare their own bird food or those who give regular treats to their birds

- Can be offered instead of table food to birds that like to eat at family mealtimes

Harrison's Bird Bread Mix – Omega 323g - £17.09

Product Code: MAH009

A Premium Certified Organic "Bake at Home" Bird Bread Mix with chia, quinoa and flax, for birds requiring additional essential fatty acids.

The Harrison's Omega Bird Bread offers a unique blend of both Omega-3 and Omega-6 oils naturally supplied by a range of organically certified premium ingredients. These oils are essential for the wellbeing of healthy pets and increased levels play a key role in the recovery of ill or injured birds. Because Omega oils cannot be manufactured by the body they need to be supplied in the diet.

The majority of seeds are generally both limited and unbalanced in the amounts of Omegas they provide with individual seed types high in one and lacking in the other. Omega Bird Bread provides both increased levels and redresses the balance providing high levels of both Omega-3 and Omega-6 (the essential building blocks of healthy cells and membranes). It can therefore play a key role in helping address the Omega levels required by birds.

RECOMMENDED USES

Provides a healthy alternative for bird owners who choose to prepare their own bird food or those who give regular treats to their birds

- A premium bird bread mix for birds requiring additional essential fatty acids
- Can be offered instead of table food to birds that like to eat at family mealtimes
- Can be used to assist in converting birds to a formulated diet
- Can be hidden as a foraging reward
- Can be used as a vehicle for administering liquid medications, or encouraging the bird to eat fruit or vegetables as the fruit/vegetables can be baked into the bread
- Provides an easy-to-use transition for hospitalized or boarding birds until acceptance of the appropriate formulated diet

Palmgloss® 100g - £25.70

Product Code: PAOAKM7

Palmgloss® is an organic dietary supplement designed to provide the essential fatty acids, carotenoids and natural vitamin E essential for the everyday wellness of your birds.

This natural oil is a great dietary supplement for all animals. It can be used alongside most avian diets (Harrison's Bird Foods, softbill mixes, egg-foods, hand rearing diets or seeds) except those which already contain Palm oil such as Harrison's Power Treats.

BENEFITS OF PALMGLOSS®

The benefits of Palmgloss® come through its natural active ingredients

- Dietary source of essential fatty acids Omega 3 and 6
- Providing increased levels of vitamin E, one of the body's natural antioxidants, an essential part of the body's immune system
- By increasing the availability of the correct forms of oils it is beneficial for all aspects of the skin and plumage, including dry and flaky skin and dull or brittle feathers
- Supplies a variety of natural carotenes such as beta-carotene, the precursor of essential vitamin A - Inactivation of bacteria, viruses and fungi, while also supporting the body's natural defences
- Medium-chain fatty acids as a readily available energy source for weakened and young animals

Composition: Organic Extra Virgin Red Palm Oil (country of origin: Colombia) Organic Extra Virgin Coconut Oil (country of origin: Sri Lanka) Organic Wheat Germ Oil (country of origin: Germany) Organic Perilla Oil (country of origin: China)

Please note that the manufacturers of Palmgloss are strictly against the destruction of the rain forest in South East Asia for the purpose of cultivating fast-growing palm oil plantations.

The organic palm oil in Palmgloss comes from sustainable organic farms in Colombia.

Avicakes Parrot 230g - £9.99

Product code: GSLNPTAVIC

Crammed packed with the flavours pet birds love!

Fruit Delight AviCakes are a mixture of wholesome fruits (cranberries, dates, mango, papaya and pineapple) and grains mixed 50-50 with nutritious pellets. All these nutrients are held together with a great - tasting natural molasses binder.

NutriBerries Tropical Fruit 284g - £10.99

Product code: 30466403

Have you tried feeding Lafeber NutriBerries to your bird? Let them join in on the fun feeding experience. A complete, nutritious food shaped into berry sized pieces, most parrots love it so much that some owners even use them as training treats. Made from all natural ingredients, they are shaped to be especially appealing to birds. The handy size makes each berry easy to hold and they're perfect for hiding inside foraging devices to keep your Parrot entertained and active. The Tropical Fruit variety of NutriBerries is made with papaya, pineapple and mango with added vitamins and minerals. Each berry contains the 40 nutrients, vitamins and minerals essential to health recommended by Dr T J Lafeber.

Lafeber Classic Avi-Cakes 230g - £67.99

Product Code: PAOAKM210

Avi-Cakes blends 50-percent premium seeds with 50-percent nutritionally balanced pellets, all held together with a great-tasting molasses binder. Its square shape is the perfect "work-and-chew-food" for your parrot to hold, pull, twist, and crunch to bring out his foraging instincts. Your bird might pick and choose his way through a loose seed mix, but he'll tear into Avi-Cakes and consume better nutrition along the way. Avi-Cake nutrition matches that of most pelleted diets and can be fed as a main meal. It is also an ideal "bridge" food to wean your parrot off of seeds and onto pellets, as many parrots start to eat pellets after eating Avi-Cakes.

Avi-Cakes is a special blend of premium seeds mixed with a nutritionally balanced pellets made from a non- GMO ingredient held together with a delicious molasses binder.

A "Work 'n Chew™" food

- Nutritionally complete
- Omega 3 & 6 balanced
- Excellent foraging food
- Naturally preserved
- Naturally flavoured
- Non GMO formula
- Great meal or treat
- Excellent conversion food

Nutrition – Small Mammal

Burgess Excel for Junior and Dwarf Rabbits 2kg - £8.75

Product code: 30125480

A delicious, complementary food for young rabbits which is also perfect for dwarf rabbits, packed with nutrients suited for your rabbits' faster metabolism. It's high in protein and fibre, and rich in nutrients for strong, happy, healthy rabbits.

- High in Beneficial Fibre (36%)
- Prevents selective feeding
- Contains prebiotics to help develop young digestive systems
- Essential amino acids for growing rabbits
- Higher protein to aid muscle development
- Fortified with vitamins and minerals to support healthy eyes, skin and coat - Higher nutrient levels tailored to faster metabolisms
- Contains antioxidants to support the immune system

Burgess Excel for Overweight Adult Rabbits 2kg - £8.74

Product code: 30157861

Vets are seeing a growing number of overweight rabbits, usually as a result of poor diet and lack of exercise. Those extra pounds put a strain on a pet's good health and can lead to fatal illnesses. Excel Light Nuggets help to promote lean body mass.

- High in Beneficial Fibre (38%)
- Prevents selective feeding
- Reduced calorie content
- Unique formula to help promote lean body mass
- Contains a prebiotic to support digestive health
- Fortified with vitamins and minerals to support healthy eyes, skin and coat
- Contains antioxidants to support the immune system

Burgess Excel for Indoor Rabbits 1.5Kg - £6.14

Product code: 30481462

While indoor rabbits might roam the lounge rather than the great outdoors, they still need to get all the nutrients from their diet that a rabbit would find grazing in the wild.

With vitamin D, dandelion and nettle, our Indoor Rabbit Nuggets have been specifically formulated for your rabbits' needs. These tasty nuggets should be fed as part of the vet recommended Excel Feeding Plan to ensure your rabbits get all they need to help them stay happy and healthy.

- High in Beneficial Fibre (40%)
- Contains prebiotics to support the immune system and healthy gut bacteria
- Dandelion added to each nugget to make them extra tasty
- With vitamin D to help support healthy skin, teeth and bones
- Nettle and dandelion are great sources of vitamins and minerals which help support all round health

Burgess Excel for Guinea Pigs 2Kg - £8.17

Product code: 30064545

A delicious, complementary food for guinea pigs that is high in fibre and Vitamin C and rich in nutrients. Due to the popularity of our Excel Tasty Nuggets for Guinea Pigs, Excel have added an extra flavour variety to this range, which contains blackcurrant and oregano which guinea pigs just love!

- High in Beneficial Fibre (36%)
- Prevents selective feeding
- High levels of protected vitamin C
- With oregano to help support digestion
- Delicious blackcurrant for extra flavour
- Fortified with vitamins and minerals to support health eyes, skin and coat - Contains antioxidants to support the immune system

Oxbow Western Timothy Hay 1.1kg - £14.22

Product code: 30144575

Oxbow Western Timothy Hay with high-fibre, low protein and low calcium content, helps keep the gastrointestinal tract of rabbits and small herbivores functioning properly.

Western Timothy is the No.1 vet-recommend hay for small herbivores.

Analytical Constituents: Protein 7%, Crude Fibres 32%, Crude Oils and Fats 1.5%, Crude Ash 0%, Moisture 15%.

Feeding Guide: Place large handfuls of grass hay in your pet's habitat daily. Mix different grass hays together to enrich your pet's diet.

Supreme Science VetCarePlus Urinary Tract Health Formula for Rabbits 1kg - £9.66

Product Code: PAOAKM209

Rabbits have a very unusual calcium metabolism. In cats and dogs, calcium absorption is regulated at gut level, and is adjusted according to the body's requirements. Any excess dietary calcium passes through and is excreted in the faeces.

However, in rabbits, calcium absorption appears to be less well regulated, and indeed appears to be proportional to dietary calcium levels, irrespective of requirements. Excess absorbed calcium is therefore excreted through the urinary tract, often resulting in urine high in calcium precipitate. Sludge in the bladder can result in discomfort and disease in predisposed animals.

Vetcare Urinary Health Rabbit Food, provides a nutritionally complete and balanced, daily diet for rabbits of all breeds and life stages (from 20 weeks+).

It is suitable for long-term feeding to rabbits that are susceptible to urinary tract disorders.

Nature's Own Sweet Green Herb Salad for Small Animals 100g - £2.20

Product Code: PAOAKM207

A diverse mix of herbs

This is a deep green, lush herb mix to encourage your animals to gnaw and forage which can be helpful for good teeth health. Grain and flake free. A mixture of valuable herbs gently dried, without any chemical additives, free of pesticide. The high-fibre components support the digestion naturally, along with the natural essential oils and flavours for the well-being of your pet. The thoughtfully chosen herbs stimulate the appetite as well as the immune system, this mixture offers a huge variety in the food bowl and resembles the animal's natural diet.

This is a complementary feed for small herbivores, we would always recommend feeding this alongside other fresh fruits, vegetables and an appropriate feed, such as our Only Natural Rabbit or Guinea Pig Feed.

Ingredients: Peas, Carrots, Beetroot, Parsley, Lucerne, Mint, Dandelion, St. Johns, Bread, Marigolds, Melissa, Red Clover.
Analysis: Fibre 9,8%, Protein 12,6%, Fat 2,4%

Feeding guidelines

We would always recommend feeding this alongside other fresh fruits, vegetables and an appropriate feed, such as Only Natural Rabbit or Guinea Pig Feed. A fresh water supply should be available at all times.

Dust extraction

All of our hay, straw and wood shavings products go through a dust extraction process before being packaged.

Guinea Pigs and Gerbils: 2 bites per day

Rabbits: 2-4 bites per day

NOTE: Please wait until your pet is weaned (10 weeks old) before feeding treats to small animals.

Nutrition – Reptile and Amphibian

Silkworms

Hatched and reared here at Oakmount, we are excited to now be offering silkworms for sale.

These are one of the most nutritious, economical and convenient feeders on the market. In fact, they are quite possibly the best herp feeder all-round!

The nutritional value of silkworms cannot be underestimated. We have shown time and time again how readily accepted silkworms are by a variety of reptile species, even those known to be picky with food. Their juicy bodies are not only tasty and enticing to your pet, but easier to chew and digest, while also being great at providing hydration.

Even better, silkworms are high in protein, calcium, iron, magnesium, sodium and B-vitamins whilst also being low in fat! As if they couldn't actually be any better, silkworms also contain an enzyme called Serrapeptase. This enzyme is thought to have many healing properties! It is an anti-inflammatory, it can break down plaque deposits in blood vessels and finally it enhances calcium absorption.

When it comes to caring for and utilising silkworms, they have a gentle, calm nature. Silkworms are silent, do not have any associated odour and will not cause any harm to your pet. Their meandering movements do not make them difficult for herps to catch either! Feeding on just mulberry chow (provided by us) they are easy to feed and look after, and live longer than many other insect types. Quite honestly, we cannot think of any other insect species that we would be as happy to promote.

We are delighted to now be able to offer them for sale to you. They are growing and thriving here at Oakmount Exotics and we will provide all necessary food and care instructions to you on purchase, for this to be continued at home.

Prices

Arcadia Reptile and Amphibian Nutrition Book - £15.00

Product code: PAOAKM57

Reptiles and Amphibians have been kept by man for thousands of years. Over the last 20 years, we have seen a boom of interest into the keeping of these incredible animals as pets and home display species...More and more research into the wild habitats of these animals is becoming easily available to keepers, and with this research comes a responsibility for reptile keepers to provide their captive animals with the essential elements needed to cause a captive animal to thrive and reproduce and not simply to survive.

One of the most worrying aspects of captive reptile care has been the food items that we have had to offer them. Do these mass-produced insects contain all the nutrition a reptile needs to thrive? Do defrosted frozen rodents really contain all of the vitamins and minerals that certain species need to survive? And how do these various vitamins and food sources interact with each other?

In this highly practical guide, we explain reptile nutrition, hydration, the vitamin groups, wild diets, supplementation, the D3 cycle, gutloading, and much, much more.

Critical Care Formula 150g - £11.94

Product Code: NEUVARKCC15

Critical Care Formula 500g - £45.38

Product Code: NEUVARKCC5

- Ideal for nursing your reptile back to health
- Made from corn starch

Vetark Critical Care formula is perfect for nursing your reptile back to health after sickness or operations. Made from Corn Starch, it features a protein concentration similar to that of an egg, packed with amino acids and other healthy nutrients to get your reptile back to health.

EmerAid IC Carnivore 100g - £12.60

Product code: 30436796

EmerAid IC Carnivore 400g - £33.01

Product code: 30449958

EmerAid Intensive Care Carnivore is highly digestible nutrition scientifically designed for critically ill carnivores, including ferrets, birds of prey, frogs, toads, some lizards, and snakes. Its ingredients have been broken down into small, easy-to-absorb components. This elemental nutrition provides nutrients in small sizes like amino acids for easier and quicker assimilation of nutrients. The carnivore then can use his or her energy to heal instead of using it to digest. The powdered formula is mixed with water to feed. An expert panel, including exotic animal veterinarians, emergency clinicians, and nutritionists, developed this formula for use in carnivores with anorexia, critical illness, post-op in debilitated patients, anemia, and more.

Key benefits:

- High energy (1.60 kcal/ml ME)
- 6-month shelf life after opening
- Usable in feeding tubes as small as 5Fr or 18-gauge feeding needle without clogging
- All ingredients are optimized for assisting stressed patients, including amino acids, easily digestible protein, omega-3 fatty acids, purified fiber, cellulose, antioxidants, stabilized vitamins, chelated minerals, balanced electrolytes, and more.
- Balanced omega 3 and 6 polyunsaturated fatty acids
- Dietary nucleotides to provide DNA and RNA precursors

EmerAid IC Herbivore 100g - £12.60

Product code: 30436821

EmerAid IC Herbivore 400g - £33.01

Product code: 30436821

EmerAid Intensive Care Herbivore is highly digestible nutrition scientifically designed for critically ill herbivorous mammals (rabbits, guinea pigs, chinchillas, and more) and herbivorous reptiles (green iguanas, tortoises, and more). Its ingredients have been broken down into small, easy-to-absorb components. This elemental nutrition provides nutrients in small sizes like amino acids for easier and quicker assimilation of nutrients. The herbivore then can use his or her energy to heal instead of using it to digest. The powdered formula is mixed with water to feed. An expert panel, including exotic animal veterinarians, emergency clinicians, and nutritionists, developed this formula for use in herbivores with anorexia, critical illness, post-op in debilitated patients, anemia, and more.

Key benefits

- High energy (1.32 kcal/ml ME)
- 6-month shelf life after opening
- Usable in feeding tubes as small as 5 Fr or 18-gauge feeding needle without clogging
- All ingredients are optimized for assisting stressed patients, including amino acids, easily digestible protein, omega-3 fatty acids, purified fiber, cellulose, antioxidants, stabilized vitamins, chelated minerals, balanced electrolytes, and more
- High-fiber content enhances gastrointestinal motility
- Dietary nucleotides to provide DNA and RNA precursors

EmerAid IC Omnivore Critical Care 100g - £12.60

Product code: 30449970

EmerAid IC Omnivore Critical Care 400g - £33.01

Product code: 30449970

EmerAid Intensive Care Omnivore is highly digestible nutrition scientifically designed for critically ill omnivores, including companion parrots, doves, chickens, finches, canaries, some lizards, and some small mammal pets. Its ingredients have been broken down into small, easy-to-absorb components. This elemental nutrition provides nutrients in small sizes like amino acids for easier and quicker assimilation of nutrients. The omnivore then can use his or her energy to heal instead of using it to digest. The powdered formula is mixed with water to feed. An expert panel, including exotic animal veterinarians, emergency clinicians, and nutritionists, developed this formula for use in omnivores with anorexia, critical illness, post-op in debilitated patients, anemia, and more.

Key benefits

- High energy (1.86 kcal/ml ME)
- 6-month shelf life after opening
- Usable in feeding tubes as small as 5Fr or 18-gauge feeding needle without clogging
- All ingredients are optimized for assisting stressed patients, including amino acids, easily digestible protein, omega-3 fatty acids, purified fiber, cellulose, antioxidants, stabilized vitamins, chelated minerals, balanced electrolytes, and more
- Balanced omega 3 and 6 polyunsaturated fatty acids

EmerAid Sustain Herbivore 100g - £9.35

Product code: 30449970

EmerAid Sustain Herbivore 400g - £22.00

Product code: 30456761

EmerAid Sustain Herbivore is highly digestible nutrition scientifically designed for herbivorous mammals (rabbits, guinea pigs, chinchillas, and more) and herbivorous reptiles (green iguanas, tortoises, and more) who are recovering from critical illness, suffering from chronic medical conditions, or being underweight. It's also a transition diet for herbivores moving from intensive care nutrition to normal food. It contains more whole nutrients than EmerAid Intensive Care HDN. The powdered formula is mixed with water to feed. An expert panel, including exotic animal veterinarians, emergency clinicians, and nutritionists, developed this formula for use in herbivores who are convalescing, or suffering from anorexia, pre- or post-op debilitated patients, anemia, and more.

Key benefits

- High energy (1.00 kcal/ml ME)
- 6-month shelf life after opening
- All ingredients are optimized for assisting stressed patients, including amino acids, easily digestible protein, omega-3 fatty acids, purified fiber, cellulose, antioxidants, stabilized vitamins, chelated minerals, balanced electrolytes, and more
- Eight sources of dietary fiber enhance gastrointestinal motility

Harrison's Fauna Flora 56g - £8.06

Product Code: MAH010

Fauna Flora is a blend of enzymes designed to aid digestion. It promotes food breakdown and nutrient absorption whilst acting as a probiotic.

Based on an organic Saccharomyces yeast, Fauna Flora is suitable for use in birds, reptiles and a range of mammals where improved digestion is required.

RECOMMENDED USES

- Sluggish digestion
- Intestinal bacterial and yeast overgrowth
- Avian Diabetes
- Sour Crop
- Improper nutrition
- Geriatric animals
- Adjunct to post-operative/convalescent digestion

WHAT DOES FAUNA FLORA DO?

Flora Fauna is activated by coming in contact with water which triggers the yeast into action. The active yeast then breaks down complex nutrient molecules into simpler more digestible and absorbable forms.

Ingredients/Composition: Saccharomyces cerevisiae yeast and the media on which it was grown, consisting of organic hominy, organic corn, organic wheat and organic sugarcane molasses. No GMOs.

Harrison's Recovery 56g - £8.06

Product Code: 30432853

Harrison's Recovery 350g - £23.82

Product Code: 30278899

Harrison's Recovery Formula provides an easily assimilated source of nutrients for sick or injured animals.

INDICATIONS

- For animals needing an easily assimilated source of nutrients
- Medical and surgical patients that are recovering from pansystemic failure and have progressed to a point where oral, easily digested diets are indicated
- When anorexia has slowed gastrointestinal emptying time. Not for cases of ileus or stasis
- For debilitated or injured animals use as gavage (tube) mix until they are self-feeding
- As a dietary transition for recovering avian patients that have been on a seed diet and need nutritional support
- For those dedicated to the rehabilitation of orphaned nestlings, Recovery Formula is ideal as a hand-feeding diet from hatching to fledging of small insectivorous birds with an apparent inability to digest cornstarch
- The Harrison's range also includes Juvenile and Neonate formulas for hand-rearing other birds

Composition: Soy protein isolate, Hi-oleic Sunflower oil, Sugar, Vegetable oil.

Nutritional additives per kg: Vitamins: Vitamin A 44092 IU, Vitamin B1 26783 IU, Vitamin B2 23800 IU, Vitamin D3 2756 IU, Vitamin E 992 IU, Vitamin B12 400mcg. Trace elements: Zinc Sulphate 132.5mg, Manganese Sulphate 44.1mg, Copper Sulphate 1.6mg.

Supplementation

Avifood Shower Spray 250ml - £25.99

Product code: MAH002

A natural, non-toxic soothing and hydrating topical spray. Available as a 250ml bottle with spray.

USES

- Helps clean skin, feathers or coat
- Restores moisture to the skin, coat or feathers that have lost natural moisture due to dry, indoor environments - Reduces dander and feather dust
- Brings out the natural lustre of the feathers or coat
- Can be used daily as a refreshing bath

DIRECTIONS FOR USE

Shake bottle well before use.

Apply mist to affected areas from a distance of 30-60cm, from once daily as a regular shower or every other day in conjunction with Avifood Spray.

Whilst Avifood Shower should not affect the eyes, we advise that sprays should not be directed at the animal's head

Composition: Aqua, Coco-Glucoside, Sodium, Coco-Sulfate, Disodium Cocoamphodiacetate, Glyceryl Caprylate, Panthenol, Glycerin, Glyceryl Oleate, Bisabolol, Guar Hydroxypropyltrimonium Chloride

Avifood Skin Soothing Spray 250ml - £29.99

Product code: MAH003

A soothing topical spray with aloe vera leaf juice and natural flower oils. Available as a 250ml bottle with spray.

USES

- Intensive moisturising care
- Designed to reduce itching and nourish dry and flaky skin
- Suitable for every skin type, even very sensitive skin
- Can provide comfort during moulting and can help reduce irritation which is often a factor in feather plucking birds
- Can be easily applied to broad areas

DIRECTIONS FOR USE

Shake bottle well before use.

Apply mist to affected areas from a distance of 30-60cm, 4 or 5 times daily

It is advised that the affected area is rinsed once every other day with Avifood Shower to remove any residue from the skin and feathers.

Whilst Avifood Spray should not affect the eyes, we advise that sprays should not be directed at an animal's face.

Composition: Aqua, Aloe Barbadensis gel, Chondrus Crispus extract, Canaga Odorata flower oil, Citrus Medica Limonum peel oil, Sodium Benzoate, Potassium Sorbate, Citric acid, Benzoic acid, Dehydroacetic Acid, Phenoxyethanol, Limonene, Benzyl Benzoate, Linalool, Citral, Benzyl Salicylate.

Biogance Opti'Plume 250ml - £11.99

Product code: MAH004

A hydrating bird care spray formulated with Aloe Vera and Cherry Blossom extract for reinvigorating dry scaly skin, restoring feather lustre, maintaining glossy plumage and promoting an overall healthy skin.

Odourless, colourless, paraben-free and 98% natural and organic ingredients. Available as a 250ml bottle with spray.

USES

- Gently cleanses
- Protects against external irritants (pollution, smoke, UV...)
- Soothes, moisturises and calms irritated skin
- Restores feather lustre

DIRECTIONS FOR USE

Apply 2 to 3 times a week from 5 to 10 cm distance on the whole plumage. For daily use, add 2 sprays to the bath water. Do not rinse. Avoid direct contact with eyes. Safe if swallowed

Ferretreat Oil 250ml - £8.00

Product code: FEW001

Can be used as an aid for trimming nails, as a reward or as a treat

Contents: Our own formulation comprising unique blend of virgin fish and vegetable oils

Storage: Store away from direct heat and light

Usage: Use within 3 months of purchase

Vetark Reptoboost 100g - £10.18

Product code: NEUVARKREPB

Vetark Reptoboost 300g - £22.88

Product code: NEUCEREP

- Electrolyte, probiotic energy drink
- Suitable for snakes, lizards and tortoises in need of a pick-me-up

Vetark Reptoboost is a probiotic combination of bacteria, enzymes, electrolytes and vitamins. Its high palatability means it can be added to the drinking water making its use simple for all species of reptiles. It is also ideal for use by stomach tube in rehydrating reptiles which have become dehydrated.

Arcadia EarthPro – CalciumPro-Mg 80g - £4.00

Product code: MF015

Arcadia EarthPro – CalciumPro-Mg 450g - £8.93

Product code: MF014

EarthPro-CalciumPro-Mg is a revolutionary new blend of finely ground, high grade, Calcium and essential Magnesium. The correct provision of Magnesium is not only vital to the 'calcium, Phosphorous and D3' cycle but it is also responsible for maintaining and regulating positive neurological and muscular health.

EarthPro-CalciumPro-Mg has been developed to be used safely in place of sole sources of Calcium. By changing your feeding cycle to include a balanced inclusion of magnesium you will help to ensure strong, firm bones, thus helping in our fight to 'Eliminate MBD'.

Magnesium is stored within the bones and helps to regulate healthy Calcium storage. It also works as a critical agent with biological enzymes to help regulate nerve and muscle function, protein synthesis, blood pressure, blood glucose levels and plays a very useful role within the digestive system. Magnesium is essential to life and up until now it has been largely missing from the dietary provision of many captive exotics. It is time to change the way we feed our pets.

**100%
Natural
Ingredients**

Calcium Carbonate, Magnesium Carbonate

Nutritional Information

Vitamin B1 10mg/kg, Vitamin B6 20mg/kg, Vitamin B12 50mcg/kg, Vitamin K 6mg/kg, Nicotinic 80mg/kg, Pantothenic 40mg/kg, Folic acid 5mg/kg, Biotin 1000mcg/kg

Analytical Constituents

Arcadia EarthPro-Ca 100g - £3.46

Product code: MF025

EarthPro-Ca is a high quality, finely ground plain Calcium powder that can be used alongside the rest of the EarthPro range to help boost Calcium levels day to day.

Calcium is stored in an animal's bones and is also released into the animal's bloodstream for muscle function. It has been known that calcium is essential for reptiles since we began keeping them as pets. In fact it is an indispensable tool in reptile keeping. A lack of supply or uptake of calcium, as we know, leads to a serious and mostly irreversible condition known as metabolic bone disease. This is where an animal loses the calcium content from its bones as the body desperately tries to find reserves from within its own body.

This manifests itself in 'bendy bones' – most often noticeable in the long bones of the legs or the jaw. In advanced cases, the animal becomes very weak due to impaired muscle function and may be unable to stand.

However, supplying calcium is only one part of the intricate web of reptile nutrition. In order for an animal to be able to use calcium at all, it must have access to the correct nutrients from its food and also its environment. This means that reptiles, amphibians and in fact many animals, need to have access to a source of UV lighting in order for its body to be able to obtain vitamin D3.

Arcadia EarthPro-A 350g - £12.58

Product code: MF019

Arcadia EarthPro-A 100g - £6.30

Product code: MF024

EarthPro-A is a blend of natural, full-spectrum minerals and vitamins designed to be used at almost every feed and for all species. EarthPro-A is one of our 'flagship' products and represents a revolution in the correct feeding for exotic pets.

We believe that all of the secrets of great captive care are hidden in the wild animal. As such we take our inspiration from wild-like food sources and feeding behaviour. We seek to mimic these processes in a safe and effective way so that our animals can truly thrive in captivity, just as they would in the wild. To achieve this accurately, we use as many ingredients as possible that are found in these wild environments in our foods and supplements.

Our 'everyday use' mineral and vitamin supplement powder, utilises the very best in scientific thought and ingredient sourcing. Rather than using a lab based approximation of the minerals that are found in the earth we use a naturally mined, 'full-spectrum' mineral clay.

To this we add high-grade Calcium for optimum bone health plus Bee Pollen, B vitamins, broad-spectrum Amino acids and Carotenoid-rich plants to help your pets thrive. Being clay-based, this powder also offers greater levels of adhesion to both plants and insects, ensuring less waste and higher levels of ingestion.

Our flagship supplement powder uses all natural ingredients to help provide for the exact needs of captive animals in a safe and effective way. It contains a potent natural full spectrum carotenoid, helping to cater for the natural Vitamin A cycle and to increase natural coloration. This provides at least 100 IU/kg of pro-vitamin A, the water-soluble natural source of vitamin A for animals that cannot be overdosed.

EP-A is a nutrient packed powder that can be used with any species, offering total peace of mind with high levels of bioavailable nutrition.

100% Natural Ingredients

Calcium powder, Mineral Clay, Amino acids, Carrot powder, Algal Carotenoid, Vitamin B complex, Bee pollen

Nutritional Information

Vitamin B1 10mg/kg, Vitamin B2 16mg/kg, Vitamin B6 20mg/kg, Vitamin B12 50mcg/kg, Vitamin K 6mg/kg, Nicotinic 80mg/kg, Pantothenic 40mg/kg, Folic acid 5mg/kg, Biotin 1000mcg/kg.

Arcadia EarthPro-RevitaliseD3 100g - £9.43

Product code: MF033

Research and Development

EarthPro-RevitaliseD3 is the result of years of research and development. By working with Vets and Reptile care experts around the world we have developed a brand new ultra-fine powder that can be used to help top up levels of preformed vitamins A, D3 and E whilst still supplying the very best of the balance of natural Earth Minerals, Amino Acids, Full-Spectrum carotenoids and Bee Pollen.

It is clear that most reptiles are better termed as being 'opportunistic omnivores', that meaning that they sometimes encounter whole animal protein in the wild diet. They may obtain most of the D3 that they require after exposure to natural sunlight and vitamins A and E from plant compounds, but there could still be a shortfall due to largely insect and plant based captive diets.

EarthPro-ReVitaliseD3 has been developed to be safe and easy to use. The risks of over supplying vitamins A and D3 can be high with the super potent powders that can be found in the hobby. These levels of potency are not required when using modern UV lighting and when feeding a full and varied diet. ReVitaliseD3 has been formulated to mimic the levels of preformed A,D3 and E that are found within a small mammal.

Feeding Guide

ReVitaliseD3 can be used within the EarthPro-Feeding Programme at either feed 8 or 16 for keepers with the correct UV and heat systems. ReVitaliseD3 can also be used safely at every 2nd or 3rd feed for those that choose to use no or low UV systems.

EarthPro-ReVitaliseD3 has all of the benefits of EarthPro-A but with added Magnesium and low levels of preformed A, D3 and E. It can be used alongside EarthPro-A and EarthPro-CalciumProMg to provide nutritional excellence.

'High levels of Bioavailable Calcium and Magnesium, essential for strong healthy bones, nerve, muscle and brain health. Plus, essential for reproductive and digestive health.

Ingredients

Calcium Carbonate, Mineral Clay, Amino acid complex (Vegetable), Magnesium Carbonate, Multi Vitamin Premix, Carrot Powder, Algal Carotenoid (full - spectrum), Vitamin B Premix, Bee Pollen.

Nutritional Information

B vitamin complex; Vitamin B1 8mg/kg, Vitamin B2 12.8mg/kg, Vitamin B6 16mg/kg, Vitamin B12 40mcg/kg, Vitamin K 4.8mg/kg, Nicotinic 64mg/kg, Pantothenic 32mg/kg, Folic Acid 4mg/kg, Biotin 800mcg/kg.
Mineral Clay; SiO₂ 57.74%, Al₂O₃ 18.23%, Fe₂O₃ 3.09%, CaO 1.93%, MgO 4.19%, K₂O 3.03%, Na₂O 1.72%, P₂O₅ 0.13%, TiO₂ 0.39%, Mn₃O₄ 0.08%, V₂O₅ <0.05%, Cr₂O₃ <0.05%.
Amino Acid complex (vegetable base) g/kg finished product; Lysine 6.36, Methionine 1.99, Cysteine 1.27, Threonine 4.93, Tryptophan 1.19, Valine 5.57, Leucine 8.59, Isoleucine 4.69, Phenylalanine 5.25, Tyrosine 4.77, Histidine 1.75, Arginine 4.37, Glycine 4.05, Alanine 4.05, Aspartic Acid 10.26, Glutamic Acid 9.06, Proline 4.05, Serine 4.37

Arcadia EarthPro-ShedSupport 30g - £6.30

Product code: MF028

EarthPro-ShedSupport is a dosed, capsulated mineral and vitamin powder to be used over the usual shedding cycle. Many of the problems surrounding poor shedding are caused by poor nutrition, poor hydration and inaccurate humidity. Animals with low levels of B vitamins can experience difficult or partial sheds.

This clever, dosed powder helps to provide support to animals from the 'inside out', boosting levels of those nutrients quickly depleted during the rigours of the shedding cycle.

EarthPro-ShedSupport contains a double dose of B vitamins, natural vitamin E from plants and Bee Pollen to aid with skin health and improvement in your animals shedding.

100% Natural Ingredients

Calcium Carbonate, Mineral Powder, Spinach powder, Papaya, Spirulina, Vitamin B, Bee Pollen

Nutritional Information

Vitamin B1 10mg/kg, Vitamin B2 16mg/kg, Vitamin B6 20mg/kg, Vitamin B12 50mcg/kg, Vitamin K 6mg/kg, Nicotinic 80mg/kg, Pantothenic 40mg/kg, Folic acid 5mg/kg, Biotin 1000mcg/kg.

Arcadia EarthPro-InsectFuel 50g - £4.19

Product code: MF017

Arcadia EarthPro-InsectFuel 250g - £12.58

Product code: MF016

EarthPro-InsectFuel is a blend of dried plants, fruits, full spectrum carotenoids, vitamins and minerals to accurately feed and nourish livefoods and pet insects. It contains no bran and as such no Phytic acid, a Calcium inhibitor and chelator. InsectFuel is a potent and balanced Bee Pollen rich source of nutrition for live insects.

It is vital that we feed our pet reptiles a diet that is rich in nutrients. They say 'you are what you eat' and it also applies to reptiles! We can only be sure of doing this if we properly feed and hydrate their live food properly.

Always keep your feeder insects in a well-ventilated tub with food and water. Insects benefit from a heat lamp and are better able to take up nutrients from the food. Arcadia Reptile InsectFuel can be mixed with warm water and allowed to cool to form into a paste. This is great for nourishing and hydrating your feeder insects at the same time without causing spillages. Alternatively, you can feed it dry as long as you provide a separate source of hydration. Feeder insects can be kept hydrated by placing pieces of vegetable with them, such as carrot or potato. Alternatively, you can place some cotton wool in a bowl and keep damp. This is a better alternative to using a dish of water, as it can easily tip over and spill water around your insects, which can kill them.

100% Natural Ingredients

Alfalfa Meal (UK), Calcium Carbonate, Carrot Powder, Protein Powder, Spinach Powder, Mineral Clay, Dextrose, Carotenoid, Papaya Powder, Bee Pollen

Arcadia EarthPro-OmniGold 300g - £14.69

Product code: MF018

EarthPro-OmniGold is the new 'Gold standard' for feeding all omnivorous animals. Designed and made in the UK to help supply all of the nutritional items that these animals, including the Blue Tongue Skink needs to truly 'Thrive' in captivity in a full and balanced way.

This wholly natural powdered diet is simply mixed with hot water and left to cool where it will form into a very palatable gel which can then be fed directly or frozen, defrosted and fed at will. EarthPro-OmniGold contains the correct ratio of approx. 50% vegetable/plant, 40% whole meat/insects and 10% Fruits, vitamins and minerals. EarthPro-OmniGold contains natural ingredients that form large parts of the wild diet including snails, earthworms, insects, bee pollen and egg that have, to date, been hard to source.

If you want to feed your animals the very best in a safe and measured way then EarthPro-OmniGold really is the answer that you have been looking for.

100% Natural Ingredients

Poultry Meal, Carrot, Mealworm, Calcium, Protein Powder, Shrimp, Celery, Beetles, Locust Bean Gum, Apple, Mineral Powder, Parsley, Silkworm, Dandelion, Dextrose, Alfalfa, Squash, Blood Powder, Snails, Papaya, Banana, Broccoli, Whole Egg, Hibiscus, Earthworm, Vitamin B Premix, Raspberry, Spirulina, Honey, Bee Pollen, Blueberry

Nutritional Information

Vitamin B1 10mg/kg, Vitamin B2 16mg/kg, Vitamin B6 20mg/kg, Vitamin B12 50mcg/kg, Vitamin K 6mg/kg, Nicotinic 80mg/kg, Pantothenic 40mg/kg, Folic acid 5mg/kg, Biotin 1000mcg/kg.

Arcadia EarthPro-StickyFootGold 50g - £6.30

Product code: MF022

Arcadia EarthPro-StickyFootGold 180g - £14.69

Product code: MF021

EarthPro-StickyFoot Gold is a brand new and all natural food specifically designed for Crested, Giant and Gargoyle Geckos. It can also be used to feed many species of Phelsuma 'Day Geckos'. This is a rich and wholesome whole powdered diet that is simply mixed with cool water.

Our gecko food contains what we believe is the perfect balance of 5 species of Insect including Calciworms and Silk worms and contains Hibiscus flowers alongside a Probiotic* to help ensure digestive health. This natural gecko diet contains full spectrum minerals, vitamins, our full spectrum carotenoid and has added Magnesium to help maintain strong bones, fruits (papaya, banana, apple, raspberry and blueberry), Flowers, Bee Pollen and Real Honey.

These amazing Reptiles need to be fed a full and varied diet, EarthPro-StickyFootGold will help you to provide this as an easy to use daily feed. EarthPro-StickyFoot Gold is the 'Gold standard' for our sticky footed friends.

This diet is nutritious enough to be fed every day but it is always recommended to feed fresh, gutloaded live food to your gecko alongside. Scientific studies have shown that geckos' diets are made up of lots of insects. Hunting for bugs also allows your gecko to use natural behaviours.

Try StickyFootGold alongside our natural jelly treats FruityInsectGold and ReptiGold.

100% Natural Ingredients

Papaya, Insect Meal (Mealworm, Beetle, Silkworm, Black Soldier Fly Larvae, Cricket), Brown Rice Flour, Apple, Potato Protein Powder, Honey, Banana, Calcium Carbonate, Mineral Powder, Guar Gum, Bee Pollen, Coconut Milk, Whole egg, Hibiscus, Dandelion, Rosehip, Seaweed, Magnesium Carbonate, Marigold, Paprika, Raspberry, Blueberry, Spirulina, Probiotic*, B Vitamins

Nutritional Information

Vitamin B1 10mg/kg, Vitamin B2 16mg/kg, Vitamin B6 20mg/kg, Vitamin B12 50mcg/kg, Vitamin K 6mg/kg, Nicotinic 80mg/kg, Pantothenic 40mg/kg, Folic acid 5mg/kg, Biotin 1000mcg/kg.

Arcadia EarthPro-InsectiGold - £15.00

Product code: MF029

EarthPro-InsectiGold is an insect-rich whole diet for insectivores. This clever mix follows on from the ever popular OmniGold by delivering high quality, whole food goodness to those species that require a little more in the way of insect protein (over 40%).

This mix is perfect to use with species including the Bearded Dragon and many of the Chameleons but it can also be used with some Monitor Lizards, Agamids, Ground Geckos and some Amphibians.

InsectiGold is balanced with small amounts of bio-available plants, vitamins and minerals, our full spectrum Carotenoid and contains Honey, Bee Pollen and a Probiotic. It is the 'Gold Standard' for insect eating animals.

This diet has been specifically developed to help make up for the shortfall between the wild and the captive diet. It will greatly increase dietary variety and enable you as a keeper to provide for their 'Wild-Like' needs.

Feeding

InsectiGold is simply mixed with hot water and then left to set into a natural and easy to feed gel. Small amounts can be made up for daily feeds or larger batches made and then frozen to be defrosted as you need at a later date.

InsectiGold can be cut into cubes and offered in a dish, tong-fed or rolled into balls. Some species of insect-eating reptile associate movement with feeding. As such, balls of InsectiGold can be rolled in front of the animal where they will see the high insect content in the food and start to eat.

Reptile nutrition is a complex process containing many essential parameters. These include the ingestion of both food and water but also external sources of 'nutrition' being heat and light including UV. These core parameters of nutrition are also dependent on providing mental and physical enrichment. Therefore the provision of live feeders to activate wild-like hunting is essential. Make sure you provide well-gutloaded live foods to provide for the enrichment and dietary need of your pet.

100% Natural Ingredients

Black Soldier Fly Larvae, Brown Rice Flour, Beetle, Protein Powder, Calcium Carbonate, Mealworm, Shrimp, Carrot, Banana, Mineral Powder, Papaya, Coconut Milk, Locust Bean Gum, Blood Powder, Apple, Dandelion, Hibiscus, Alfalfa, Honey, Bee Pollen, Spirulina Power, Probiotic* Rosemary Extract

Arcadia EarthPro-DragonFuel 125g - £10.00

Product code: MF026

EarthPro-DragonFuel is an all natural, non-toxic food sprinkle with a wholesome mix of plants, fruits, flowers and leaves including Hibiscus, vitamins and minerals selected to fuel all omnivores, particularly bearded dragons. This supplementary food can be mixed into the usual daily food thus greatly increasing dietary variety.

It can be difficult for owners to find a wide variety of vegetable foods that their pet will accept. EarthPro-DragonFuel is a delicious reptile food that will increase variety for your reptile diet. This supplementary food is designed to contribute up to 10% of your reptile's diet. The rest should be made up of fresh gutloaded livefoods and vegetable matter. It is packed in easy to reseal pouches for ultimate freshness and contains literally hundreds of ingredients.

EarthPro-DragonFuel also contains UK grown Alfalfa and for the first time an active Probiotic. Contains the super food Bee Pollen and a balance of 9 B Group Vitamins supporting: immune function, wound healing, tissue repair and overall health. Accurate feeding of captive exotics is all important. Allow nature to provide for our pets and then watch and enjoy the positive results.

100% Natural Ingredients

Alfalfa, Calcium Carbonate, Nettle Leaf, Parsley, Marigold Flowers & Petals, Dandelion, Carrot Powder, Protein Powder, Spinach Powder, Mineral Powder, Hibiscus Flowers, Red Clover, Bell Peppers, Dextrose, Papaya Powder, Chamomile Flowers, Cut Hibiscus, Vitamin B, Hemp Powder, Aloe Powder, Bee Pollen, Watercress, Raspberry Powder, Mango Power, Probiotic

Analytical Constituents

Crude Protein	16%
Crude Fats & Oils	3%
Crude Fibre	18%
Moisture	<8%

Arcadia EarthPro FlowerBoost 60g - £6.00

Product code: MF020

It can also be mixed into DragonFuel and OmniGold. Rich in vitamin C and antioxidants, FlowerBoost does not contain any phytic acid and it is very low in oxalates. Oxalates are not good for reptiles in high amounts because they prevent the uptake of important minerals from an animal's food to its body during digestion. This makes it very safe to feed.

Feeding herbivorous and omnivorous animals has always been a challenge. Many species have developed over vast periods of time to benefit from a great deal of dietary variance. For many of us we simply do not have access to a wide enough species of plants.

Following on from the huge success of DragonFuel, we are delighted to introduce FlowerBoost into our range. FlowerBoost is a mix of hard to find dried flowers and petals.

Use as required to 'Boost' the daily diet or as a treat on its own.

100% Natural Ingredients

Marigold Flowers, Hibiscus Flowers, Rose flowers, Red clover, Cornflowers

Nutritional Information

Vitamin B1 10mg/kg, Vitamin B2 16mg/kg, Vitamin B6 20mg/kg, Vitamin B12 50mcg/kg, Vitamin K 6mg/kg, Nicotinic 80mg/kg, Pantothenic 40mg/kg, Folic acid 5mg/kg, Biotin 1000mcg/kg.

Analytical Constituents

Arcadia Supplement & Gut loader Starter Kit - £13.63

Product code: MF056

SUPPLEMENT & GUTLOADER

Starter Kit

Rarepskit

4 essential mixes for vitamin and mineral provision, shedding and gutloading live feeders.

EarthPro JellyPot Gold Range

Unlike many premade jellies, the EarthPro-JellyPot Gold range uses very high quantities of whole fruits, honey, bee pollen, insects and plants to ensure that your JellyPots are as nutritious as possible each and every time.

We use no artificial colours or flavours, just pure, wholesome goodness.

These products are a perfect blend of wholefood ingredients in a fun to make, cost effective and easy to feed JellyPot.

- 2 types available
- Dry powder
- No artificial colours or flavours
- Natural ingredients

Arcadia EarthPro-FruityInsectGold - £6.30

Product code: MF031

Arcadia Reptile EarthPro-FruityInsectGold is a convenient and easy to use treat food which can be easily made into a jellypot feed by adding hot water and leaving to cool. FruityInsectGold contains all-natural ingredients including fruits, honey, bee pollen, insects and plants with no artificial colours or flavours. FruityInsectGold contains roughly a 50/50 mix of fruits, honey and Bee pollen and whole crushed insects.

Feeding Instructions: FruityInsectGold is a high insect/high fruit treat food for omnivores that has been designed to be fed alongside the main diet in order to increase dietary variety. This all-natural mix can be fed at will alongside the main diet to a level of around 10-15% of the total diet. Measure out powder, add hot water as indicated, refrigerate until set then feed.

Ingredients: Black Soldier Fly Larvae, Papaya, Calcium Carbonate, Coconut Milk, Locust Bean Gum, Silkworm, Banana, Mealworm, Apple, Cricket, Raspberry, Honey, Blueberry, Vitamin B, Bee Pollen.

Uses: Crested and Day Geckos, Bearded Dragons, Chameleons and Agamids

Nutritional Information: 26% protein, 7% crude fibre, 13% crude oils and fats, 6% crude ash, <8% moisture.

Arcadia EarthPro-ReptiGold - £6.30

Product code: MF032

Ingredients: Papaya, Raspberry, Apple, Coconut Milk, Calcium Carbonate, Locust Bean Gum, Honey, Bee Pollen, Blueberry.

Uses: Suitable for Phelsuma, Crested, Giant and Gargoyle Geckos.

The perfect treat for pets that require a little more in the way of insect protein.

100% Natural Ingredients

Komodo tortoise flower mix 60g - £4.59

Product Code: PAOAKM206

- Contains marigold flowers, rose and sunflower petals
- Fragrant and colourful
- Helps immune system

Komodo's Tortoise Flower Mix 60g combines marigold flowers, rose and sunflower petals providing a fragrant, colourful addition to a tortoise's diet as well as helping to strengthen their immune system.

Zoo Med Reptisafe 125ml - £7.49

Product code: MF071

Clean and healthy source of water

Zoo Med Reptisafe is an instant terrarium water conditioner providing your reptile with a clean and healthy source of water.

Avipro Avian 100g - £10.19

Product code: 30430483

Great for any sick or stressed bird, Avipro Avian has been developed from the long established Avipro Plus. It can be used in your bird's drinking water or sprinkled on food, whichever you find the most effective way of feeding. Avipro Avian contains fructo-oligosaccharide soluble fibre, glucose, electrolytes and Vitamins A, C & E to replace what might be lost in sickness and stressful situations.

The probiotics help to maintain a healthy gut. Vitamins A, C & E help to restore and maintain good levels commonly more quickly used up during times of stress. Electrolytes aid in maintaining adequate levels during bouts of diarrhoea. Soluble fibre prebiotics increases the effectiveness of the probiotics. Using Avipro Avian can prove to extremely valuable for supporting your bird at times of stress, or when ill and off their food, undergoing a lot of handling, showing or simply going to a new home. Birds, which show 'nervous traits' such as feather plucking, which can be linked to abdominal colic etc can also benefit. If your bird is under treatment with antibiotics, Avipro Avian can really help. Normal gut flora may be unbalanced by the treatment, which can cause bad bacteria to flourish, many of which can form toxins.

If your bird is on an antibiotic course, please check with your avian vet before using this product. Comes with a 5ml scoop.

ACE-High 50g - £8.14

Product code: 30105937

ACE-High 100g - £13.46

Product code: PAOAKM103

Made so you can provide your bird with high levels of the vitamins shown to be involved in helping birds through times of stress and illness. Vitamins A and E both help your bird resist infection. Vitamin A is essential for maintaining a healthy gut. Vitamin E is known to provide a boost to the immune system. Vitamin C is used up quickly when a bird is under stress, so replacing it is important. Seed eating birds and Parrots tend to get very little nutrition from their diet. Vitamin and mineral deficiency can easily manifest into such problems as poor fertility, snuffles, pneumonia, feather plucking and even kidney disease. ACE-High can easily be added to your bird's diet helping to ensure they stay fit and healthy.

Vetark BSP Drops 50ml - £8.99

Product code: 22050080

This broad spectrum multi-vitamin liquid is ideal for routine use in the drinking water for your bird. It enables effective supplementation for the pickiest of parrots. It contains no sugary flavourings which could encourage bacterial growth in the water.

Disinfection and Chicken Products

BioShield P 5L - £27.66

Product code: CV013

Broad spectrum and high foaming disinfectant - High foaming properties

- Potent prolonged effect
- Effective in the presence of organic matter
- Effective against bacteria, viruses, moulds and fungi
- Effective disinfection of all classes of livestock housing
- DEFRA Approved

BioShield is broad spectrum and effective against viruses, bacteria, mycoplasma and fungi. It is active in the presence of organic matter and can be used effectively in both hard and soft water.

Instructions for use

1. After washing and cleaning thoroughly, apply at the required dilution rate via a power washer and foaming lance, or other foam generating equipment, covering all surfaces with an even layer of foam
2. Avoid excess application on vertical surfaces as this will result in downward drift and reduced contact time
3. Alternatively, use at the required dilution rate via a power washer set at low pressure (1000 psi) with a wide-angled jet

Applications

Disinfection of livestock buildings, foot and vehicles baths. Suitable for broilers, broiler breeders, sheep pens, calf pens and general purpose disinfection.

Usage Guidelines

Disinfection for a house size of 10,000 f2/1000 m2 - 6 litres in 600 litres of clean water. Foot and wheel dips 1:155.

The Chicken Vet BioVX 1kg - £21.94

Product code: CV003

Concentrated Virucidal Disinfectant

- Effective against bacteria, moulds, fungi and all viruses - Bio-degradable
- Effective against biofilms
- Superior dilution rate giving increased economy

Chicken Vet BioVX is broad spectrum and effective against bacteria, fungi, yeasts and all known classes of virus. Because of superior dilution rates it is highly cost-effective, works equally well in both hard and soft water and is unaffected by temperature fluctuation.

General Properties

A white powder consisting of stabilised blend of peroxygen compounds, surfactants, organic acids and an inorganic buffer system.

Instruction for Use

1. Apply at the recommended dilution rate via a power-washer set at low pressure (100psi) with a wide angled jet, thoroughly wetting all surfaces but avoiding excess run off.

General orders application: 1:100* Foot and mouth disease: 1:1200* Swine vesicular disease: 1:135* Disease of Poultry Orders: 1:285* *DEFRA Approved.

2. Disinfection:

For general purpose disinfection apply to surface using a back pack sprayer at a dilution of 1:200, thoroughly wetting all surfaces. This will require 250-300ml of solution per m² to achieve thorough wetting.

3. Water Sanitation:

During terminal disinfection, drain header tank and clean, fill tank and dose with Chicken Vet BioVX to achieve 1:200 dilution. Stand in system for 1 hour, drain and flush with clean water. In the presence of animals, dose the header tank daily with a 1:1000 dilution.

4. **Fogging:** Using a mechanical fogger apply a 1:200 dilution as a fine mist. This procedure can be safely carried out in the presence of livestock at times of disease challenge.

Pack Size 1 kg tub

Interkokask RTU (The Chicken Vet recommended) 500ml - £17.47

Product code: CV015

Interkokask RTU is available to the public via the veterinary surgeon. Effective disinfection against bacteria, viruses and fungi, mites and mite eggs, worms and worm eggs, coccidial oocysts and cryptosporidium

It is a development of the commercial disinfectant Interkokask which has been approved by DEFRA in the UK, and to the German DVG and European hygiene standards.

General properties

Clear liquid. A blend of Acidic Phenol and 4-chlorine-3-methylphenol

Active ingredients

Chlorocresol

Instructions for use

Interkokask RTU is a surface disinfectant and should NOT be used while the animals or birds are present in the housing. The disinfectant should be left in contact with the surface housing for up to 2 hours and ideally allowed to dry.

Precautions

Usual safety precautions should be observed when handling chemicals. - If swallowed seek medical advice immediately and show this leaflet

This product and its container must be disposed of safely

- The bottle must be transported and stored upright - Protect from frost
- Avoid direct contact with cats and fish
- Do not spray onto furniture or soft furnishings
- Can also be used for disinfecting
- Dog kennels/runs/yards, rabbit/guinea pig hutches, small animal cages, pigeon lofts, chicken houses, dovecotes and vivariums

The Chicken Vet Poultry Disinfectant 1L - £8.16

Product code: CV010

A powerful biocidal disinfectant, cleaner, sanitiser and odour neutraliser.

Chicken Vet Disinfectant is in a ready to use spray for use on poultry housing and associated equipment.

- Powerful biocidal disinfectant
- Cleans and breaks down organic matter where mite parasites breed and thrive - Does not contain any poisons
- Has shown to be effective against the management of red mite

General Properties

Clear liquid. An alkaline blend of non-ionic and amphoteric surfactants in an aqueous solution.

Instructions for Use

The product is ready for use. To clean and sanitise your coop, remove all litter and manure. Spray interior areas and all equipment with Poultry Disinfectant solution, paying particular attention to joints and crevices where red mites hide. Reapply every two weeks or as necessary.

The storage and handling of this product should be performed wearing suitable protective clothing. Wear a mask in a contained space. Avoid contact with skin and eyes. Store upright in a cool place and keep out of the reach of children. Pack size: 1L Ready to use.

The Chicken Vet Dri Bed 5kg - £15.96

Product code: CV008

Environmentally friendly safe for humans and chickens

- No egg withdrawal period
- Easy to apply
- Super-absorbent, deodorising powder with enhanced disinfectant properties.

Instruction for Use

- Super-absorbent
- Reduces ammonia and other noxious gases
- Absorbs virtually its own weight
- Inhibits the growth of bacteria
- Contains BioVX a DEFRA approved disinfectant
- Extends bedding life
- Environmentally friendly
- Non-hazardous

Chicken Vet Dri Bed is one of the most absorbent powders on the market. Kind to livestock and kills bacteria.

General Properties

A powder ideal for use in all livestock housing and is suitable for use with animals and birds of all ages. Chicken Vet Dri Bed has unique odour control formulation which eliminates strong ammonia smells. Chicken Vet Dri Bed is also excellent at absorbing water, this benefit is enhanced due to Chicken Vet Dri Bed containing a DEFRA approved disinfectant, which helps control bacteria and viral challenges.

By drying out the litter, Chicken Vet Dri Bed reduces the spread of Necrotic Enteritis and salmonella, amongst many other infections and generally reduces cross infections.

Apply 50gm/m² to animal bedding and also spread under drinker lines and troughs.

Pack Size 5kg

Red Top Fly Trap - £11.93

Product code: CV016

The Red Top Fly Trap can capture up to 20,000 flies and last up to 12 weeks.

Just hang the trap away from the poultry house and the flies will be drawn to the attractant. This is a very popular product which really does work, even our vets use them at home!

This product comes 'The Chicken Vet Recommended'

The Chicken Vet Mite Traps and Sticky Pads - £9.98

Product code: CV009

These traps provide an easy way of checking if there are mites present in your chicken house, as well as the added bonus of monitoring and trapping these persistent parasites. The traps are placed strategically within the chicken house (instructions provided) and will successfully trap mites. They can be used in conjunction with other methods of mite control.

This kit contains two mite traps and one pack of 10 sticky attractant papers.

Dergall™ 100ml - £21.00

Product code: CV006

Dergall™ is suitable for the control and management of red mites, northern fowl mite and scaly leg mite in chickens. Red mites are nocturnal so only make an appearance at night, this can sometimes lead you to think there are not any in your chicken house. When red mites come out they are on a mission to feed by sucking your bird's blood. This is highly irritating for the birds, causing agitation and prevents the birds from resting. If left without treating, red mites can induce a drop in egg production, stress and eventually anaemia through excessive blood loss. In extreme cases they may die.

Contents

Organo-modified siloxanes, silanes, antioxidants.

Storage

Store between 0°C-30°C.

Safety advice and full instructions inside the pack.

This product comes 'The Chicken Vet Recommended'

The Chicken Vet Natural DE Powder 400g - £9.01

Product code: CV005

The Chicken Vet Natural DE Powder 1kg - £15.52

Product Code: PAOAKM204

Natural Diatomaceous Earth Powder is a desiccating powder for use in poultry housing with the purpose of drying litter to reduce ammonia, moulds and fungi and to deter the colonisation of mites and other crawling insects.

- Natural organic powder - Odour and stain free
- Pesticide free

Can be applied directly onto the chicken and to the chicken house.

Safe to use directly onto your hens. Apply the powder under the wings and around the vent area. Also apply to the coop by spreading the powder in cracks, crevices and nest box areas where mites hide. Rub along perches and apply to the house floor after cleaning out. It can also be placed in a cat litter tray with some dry soil and the hens can self-treat themselves by dust bathing.

Use for prevention or as part of a mite control treatment to reduce mites and lice in your poultry. This product comes in a handy puffer container for ease of use.

The Chicken Vet Flubendazole 1% 60g - £23.10

Product code: CV014

This wormer is suited to worming chickens, geese and turkeys for the control of gapeworm, roundworm, caecal worm, hairworm and gizzard worm.

Actively controlling adult worms, along with their larvae and eggs. Flubendazole is given over 7 days to eradicate all these stages of the worm's lifecycle. Whilst treating your birds you can still consume their eggs as there is a zero egg withdrawal period. We recommend using a faeces sampling kit to check if worms are present before worming.

60g pack will medicate 20kg of chicken or goose feed or 30kg of turkey feed.

We can only supply this product if the wormer is mixed with the feed at the house where the birds are kept and those birds and their eggs are not reared for sale or supply for consumption off the premises.

To make sure you receive the correct treatment/medication, our vet requires some details about your chickens, please call us directly at the practice on 01282 423 640 to discuss and order.

The Chicken Vet Beryl's Friendly Bacteria 12 bird sachet - £16.87

Product code: CV012

Beryl's protects the gut from harmful bacteria.

Beryl's Friendly Bacteria is presented as a live soluble powder which contains a complex range of bacteria derived from poultry. These are favourable bacteria which colonise the chicken's gut thus protecting it against harmful bacteria such as Salmonella, E.Coli and Clostridium. Beryl's is particularly useful at times of stress (e.g. travelling, showing, breeding), if your birds have diarrhoea, following an illness for supportive therapy and especially following antibiotics. Antibiotics destroy good and bad bacteria therefore Beryl's is an excellent treatment to replenish favourable bacteria in the gut. Aged hens also benefit from Beryl's every few months to keep them in good health.

1 pack treats up to 12 birds; overdosing is not going to harm your birds. Currently only available in a 12 bird pack due to changes with the manufacturing process.

Beryl's has organic approval status with Organic Farmers and Growers and the Organic Food Federation.

Important notes

Beryl's Friendly Bacteria is a live product and needs refrigerating when not in transit. Once the sachet is opened, all contents should be used immediately.

The Chicken Vet Biostop 100ml - £10.34

Product code: CV004

A herbal product to help maintain and support intestinal upset.

Biostop is specially formulated for administration to all species and commercial breeds of poultry at times of intestinal upset. It can be particularly effective when difficulties are encountered during antibiotic therapy.

No egg withdrawal period.

Composition

Mixture of flavouring compounds, thymol, glycerine, sorbitol, propylene glycol

Instructions for use

Put in drinking water at a rate of 5ml/10 litres for 3 - 10 days.

How does Biostop work?

- Supports the gut during times of diarrhoea.
- Due to its astringent properties, it creates a layer of denatured protein on the surface of the intestine wall, which stops the effusion of water and electrolytes to the intestinal lumen.
- It reduces absorption of free non-protein toxins from alimentary tract, while bonding protein toxins (mostly bacterial ones) into insoluble conglomerates, which are removed through the enteral route.
- It stabilises the increased peristaltic motions that accompany intestinal upset.
- It normalises the state and the activity of intestine mucous membrane.
- Pack Size: 100ml.

The Chicken Vet Poultry Multivitamins 500ml - £16.07

Product code: CV011

Chicken Vet Poultry Multivitamins is a concentrated supplement formulated by poultry vets and nutritionists. They are intended to supplement the drinking water of poultry at times of poor condition or decreased appetite and contain a specific blend of vitamins, minerals and amino acids, with the addition of essential oils and antioxidants.

At certain times, chickens can benefit from additional nutrients to give support to their system. These help stabilise the internal balance, as some nutrients are used up faster or are required in larger quantities particularly during times of challenge or stress. A disruption to the balance can induce a decreased appetite, therefore reducing feed intake and egg production. As chickens usually continue to drink, the addition of supplementary vitamins to the drinking water help support the bird, as they will be ingesting more of these vital nutrients through their water.

Challenges can appear at any time due to a variety of environmental, pathogenic or performance related factors, for example, during moulting, peak egg production, when new birds are added to a group or during poor health status. The inclusion of a balanced range of multivitamins, minerals and amino acids helps sustain chickens during recovery and at times of risk when proactive supplementation is key (high temperature, wet and humid conditions).

Chicken Vet Poultry Multivitamins are supported by additions of natural ingredients:

- Antioxidant blend from ingredients renowned for their potency
- Natural prebiotic fibres, feeding the healthy gut bacteria in the bird's digestive system
- Essential oils from Oregano

The combination of palatable Oregano, known for its antibacterial properties, prebiotics and natural antioxidants help maintain a healthy gut environment and development of a natural immune system, which are so important to maintain a healthy productive flock.

Research suggests that a healthy supplementation of antioxidants, vitamins and minerals can have a beneficial effect on egg quality and egg production.

Instructions for use

Dilute 15ml of Poultry Multivitamins into 2 litres of clean water. Use for 5 days following the introduction of birds into your coop. Use for 3-5 days if your birds are challenged with disease or an illness. Use for up to 7 days during moulting. For other challenge periods not mentioned above, use for 3-5 days.

Contraindications

Dilute into clean drinking water only.

The Chicken Vet Digesti-Health 2kg - £19.28

Product code: CV007

Digesti-Health is a daily feed supplement to encourage digestive health and overall well-being.

Digesti-Health is designed to help stressed birds; following a recent move, when broody, during weight loss or during moult, but most importantly it can be used on a daily basis as a general supplement to optimise digestive health.

Digesti-Health reduces the levels of mycotoxins present in the feed. Although mycotoxins are screened by most feed companies in an attempt to keep toxin levels under control, toxins are a natural inherent part of the feeding process.

When cereals are grown and stored, microscopic fungi can develop, producing toxins which can lead to a wide range of conditions from liver damage to poor hatchability and even death. The addition of Digesti-Health actively absorbs a wide range of toxins, giving peace of mind when feed is stored or is possibly damp in a field environment. Do not feed visibly mouldy feed to poultry as this is unsuitable on all levels.

Digesti-Health contains organic minerals and organic selenium. These minerals are required for normal metabolism and have an antioxidant activity. It is the unique presentation of the natural minerals which allows increased availability to the bird. In the older bird where the passage of time has possibly damaged the intestine, the use of these organic minerals will help to ensure that the bird is able to absorb its nutritional requirements. This is a very useful addition to the diet of the re-homed hen who will be starting her new life at the average age of 72 weeks.

Finally, there are Beta Glucans which are thought to have a boosting effect on the birds' immunity. This is useful in older birds or any bird whose immune system has been depressed following ill health.

This daily supplement will maintain optimal digestive health and overall well-being. It contains ingredients that will improve egg and egg shell quality and hatchability.

Crude Protein	9.50%	Oils and Fat	3.50%
Crude Fibre	2.00%	Crude Ash	4.40%
Methionine	0.14%	Lysine	0.20%
Sodium	0.10%		

The Chicken Vet Anti Peck 250ml - £8.95

Product code: CV001

Effective solution to prevent feather pecking, cannibalism and anti-social behaviour in poultry.

- Food safe
- Non-tainting
- Non-staining

Chicken Vet Anti-Peck Spray has been carefully formulated to curb the anti-social feather pecking poultry can display to other birds. Birds are often bullied by the hierarchy (pecking order) of the flock. This can range from minor feather pecking to more extreme cases of aggressive behaviour, cannibalism and eventually death.

Presentation

A clear liquid with a faint odour in a spray bottle ready to use. Contains bitterex which is a strong and bitter tasting product which deters feather pulling and eating.

Instructions for use

1. Spray on the affected area of the victim(s)
2. Continue to use for at least 7 days
3. Repeat if required
4. Spray all birds in the flock if necessary to prevent the problem becoming a wide spread habit.

Avoid contact with eyes.
Pack Size 250ml.

Bedding, toys and accessories

Tumblefresh Bedding 8.5L - £6.26

Product code: 30373197

Tumblefresh is naturally low in dust and hypo-allergenic so it is suitable if your pets have allergies. It helps to eradicate odours and lasts longer than traditional bedding.

- Helps to eradicate unpleasant pet odours
- With no artificial colours
- Safe and hygienic-helps keep pets fresh
- Highly absorbent
- Lasts longer than traditional bedding

Habistat Vermiculite Substrate Fine 5L - £4.43

Product code: MF061

- 100% natural
- Can be used as a substrate, for egg laying or as an incubation medium
- Fine or Coarse varieties available
- Now in biodegradable bags

Made from exfoliated volcanic rock, Habistat Vermiculite can be used as a substrate for egg laying or as a natural incubation medium. An excellent retainer of high levels of moisture, Vermiculite's composition ensures that it will not decompose or go mouldy. Small spiders and invertebrates that require high humidity will thrive using this substrate. The Habistat range are all now packed in 100% recyclable and biodegradable paper bags.

Directions for Use: Moisten to desired level to use as a substrate for invertebrates or mix with Habistat coir to add texture for burrowing species. For use as egg incubation add water to desired level to maintain humidity for your eggs.

Komodo Humidity Gauge - £9.99

Product code: MF063

- Measures both temperature and humidity
- Easy to read dial display

Komodo Combined Thermometer and Humidity Dial Hygrometer measures both temperature & humidity. An ideal space saving dual gauge for a terrarium. The easy to read analogue dial display with colour coded scales shows both Celsius and %RH.

Habistat Dimming Thermostat 600W - £63

High Range Black

Product Code: MFH061B

High Range White

Product Code: MFH061W

Standard Range White

Product Code: MFS061W

Standard Range Black

Product Code: MFS061B

The sophisticated Habistat Dimming Thermostat is designed specifically for controlling light bulbs.

The Dimming Thermostat is one of the most accurate methods of temperature control and whilst it is perfect for controlling light bulbs, it can be used on almost any heaters.

Unlike other Habistat Thermostats, it does require a minimum load of 40 watts, but has a maximum capacity of 600 watts at 230 volts.

We only recommend this thermostat for use with incandescent light bulbs. It uses the latest technology and operates in a manner similar to the Pulse Proportional Thermostat.

Instead of pulses of power being supplied to the heater, it is supplied with a continuous variable supply of power or voltage. In principle this has a similar effect to light dimmers or rheostats in your home.

Available in Standard and High Range versions in either black or white.

All Habistat thermostats come with a 5-year guarantee.

Exo Terra Cricket Pen Small - £13.29

Product code: MF052

Exo Terra Cricket Pen Large - £29.79

Product code: MF0053

Complete cricket care kit- Removable, well-ventilated lid- Includes cricket food dish and water bowl- Easy cricket dispenser

The Exo Terra Cricket Pen is ideal for housing, keeping and dispensing live crickets and reptile products. Crickets prefer dark spaces, and will readily crawl into the tubes which provide hiding places for them, making it easy to use the tubes as dispensing tools. The tubes remain in position when the lid is removed, allowing easy access and less chance of cricket escape.

Boston's Boredom Breaker - From £25 (prices vary depending on requirements)

Product code: WEL001

These bespoke wood, sisal and rope interactive chew toys are made locally by a highly experienced parrot keeper. They are designed with the knowledge of what your bird needs to satisfy natural behavioural drives while also stimulating the brain

These toys will keep your bird entertained for hours with the added bonus of visual stimulation and beak exercising. Natural wooden toys made to your requirements in a range of non-toxic colours, these are the perfect entertainment solution for your feathered companion!

*Model Shown Length 17 inches, width 10 inches. 20 wooden blocks - £25
