

In-person or remote CPD

Let us visit your practice to provide small group CPD on one of the topics below (or let us know if there is something else you want, and we will see what we can do!).

Internal Medicine

- Investigation and management of chronic gastrointestinal disease
- Diagnosis and management of pancreatitis
- An approach to urinary tract disease
- Medicine case discussions
- Endoscopy
- Hepatobiliary disease

Anaesthesia

- Capnography – when, how, why and troubleshooting.
- Understanding ECG's.
- Ventilators – how to set them up and how to monitor ventilated patients.
- Managing hypotension.
- Pain scales in practice.... which ones to choose for my clinic.
- ACP vs medetomidine: can we use either or both?
- CPR: how to create an effective CPR strategy.
- Brachycephalic dog anaesthesia – how to make it as safe as possible.
- Dental nerve blocks.

Soft Tissue Surgery

- Brachycephalic Obstructive Airway Syndrome (BOAS)
- Laryngeal Paralysis
- Gastrointestinal surgery and management of complications
- Wound management and reconstruction of traumatic wounds
- Oesophageal foreign bodies & stick injuries

Orthopaedic Surgery

- What does a specialist orthopaedic exam look like?
- Does neutering really cause joint disease and cancer?
- How should we help pet owners understand complex problems?
- Is video the best way to explain surgical aftercare?
- Is the caregiver placebo effect important?
