Dietary Supplements

PAGE 1

We are very aware of how daunting it can be as a horse owner trying to choose a dietary supplement. In order to simplify matters we have selected six supplements for key equine complaints from the Equistro range. These premium quality supplements are produced by the veterinary company Vétquinol and supported by leading authorities in the field. If you have any questions please do not hesitate to contact us on **01505 610100** or visit www.equistro.co.uk.

Musculoskeletal - FLEXADINE UCII

Uses: Aids and supports healthy joint function. Recommended for athletic and competition horses, as well as those older animals that need to move more freely. Will also benefit horses with arthritis affecting one or more joints

Administration (500kg horse): 15g once daily for 12 weeks or until response observed, then 10g once daily – cost £1.36to £2.04/day.

Hoof, hair and skin - KERABOL BIOTIN

Uses: Promotes healthy hair and hoof horn growth, promoting a shiny coat and healthy hoof that is supple and not too brittle. Recommended for horses with poor coat condition or dry and cracked hooves, as well as those with poor hoof conformation such as collapsed heels.

Administration (500kg horse): 15g daily – cost £0.43/day

Digestive system - LEGAPHYTON

Uses: To help maintain and support a healthy liver. Recommended for horses and ponies with liver disease, including those with inflammatory, infectious or toxic (Ragwort) damage to the liver.

Administration: (500kg horse) 30g scoop daily – cost 0.43/day

Vitamins and minerals - MEGABASE

Uses: A general vitamin and mineral supply to maximise performance potential and to maintain normal growth and development. Ideal for young and old animals alike, as well as those that require a little help to maintain peak health and performance.

Administration: (500kg horse) 30g daily – cost £0.26/day

Body condition and muscle development – MYO POWER

Uses: To help muscle development and conditioning for horses in training, competition and for youngstock. Recommended for young horses undergoing early training as well as athletic horses at the beginning of the competition season, after a period of rest or during hectic periods of activity. Can also benefit rapidly growing foals, horses on box rest or convalescing from injury/disease, and older horses that struggle to maintain body condition.

Administration: (500kg horse) 50g daily - cost £2.00/day

Nervous system - EQUILISER

Uses: To help horses deal with and remain calm during periods of stress such as competition or changes in management. Can help render 'hot-headed' horses more manageable. Recommended for horses that travel poorly or do not settle when on box rest or separated from a companion.

Administration: (500kg) 20g scoop daily – cost £1.52/day.

Notes

1. Please note that you must know the weight of your horse to ensure you are administering the correct amount.
2. Costs are approximate and will vary according to the weight of your horse and fluctuations in the manufacturer's retail prices.
3. Other products in the Equistro range may be of benefit to your horse – please contact the practice if you have a specific problem or product in mind.
