Independent Vetcare EMS Programme

IVC is committed to being the Veterinary Employer of Choice, and as such we are keen to help develop the vets of tomorrow, today. We have worked closely with a wide range of experts from vet schools, our own practices and veterinary sector professionals to develop a structured three-year Extra-Mural Studies (EMS) programme that is second to none:

- Beginning in Year 3 (and continuing into years 4 and 5) EMS students undertake four fortnightly EMS placements in total, each with a dedicated Clinical Coach
- EMS can be undertaken at the same practice, or at up to four of the many IVC practices who have signed up to the EMS Programme. (see IVC website for details)
- Each placement supports you in developing confidence and competence in a wide range of recommended procedures, clinical and interpersonal skills - see one, assist one, do one
- Excellent networking opportunities and real-world experience of the daily practicalities of your veterinary career
- Potential to enrol in the Graduate Academy after you qualify, leading into a rewarding career with IVC
