INDIBA Therapy

We are pleased to introduce our newest piece of rehabilitation equipment the INDIBA electromagnetic radio frequency machine.

The INDIBA device is designed to support rehabilitation from injury, assist recovery and performance and can be used for pain management, and injury prevention.

The benefits of INDIBA include the following:

- Accelerate recovery of acute and chronic musculoskeletal injuries (including tendonitis, bursitis, desmitis, muscular tears)
- Treatment of injuries in deep areas that other traditional therapies cannot access
- Osteoarthritis management
- Pain reduction
- Increased stride length
- Post-surgical recovery
- Wound healing
- Improve tissue flexibility
- Thermo therapy
- Lymphatic drainage
- Improve muscular stability and recovery of mobility
- Supports the function of manual therapy and rehabilitation when used alongside regular physiotherapeutic treatment
- Can be used in conjunction with veterinary treatments including stem cell injections and PRP

Treatments are offered in clinic at a one off cost of £70 per session

Course of 6 sessions (1 session per week for 6 weeks) at a fixed price of £380 (a saving of £40)

Course of 12 sessions (3 sessions per week for 3 weeks, followed by 1 session per week for 3 weeks) at a fixed price of £750 (a saving of £90).

Other courses may be advised and will be quoted where necessary. For acute cases where treatments are advised more than once per week a special full livery package can be offered as part of the package.

Your horse will be assessed for suitability and examined by your case veterinary surgeon and following an initial consultation (included within the package price) a treatment protocol will be drawn up for your horse and the sessions administered by suitably qualified and trained members of the orthopaedic team. Referrals from other veterinary practices or suitably qualified individuals are welcome provided full medical history is provided. All cases will be assessed and treated only as necessary by a member of the orthopaedic team as per personal assessment.
